MEDICINE

LSMU Medicine is one of the most modern and popular study programmes in Lithuania with old academic traditions. Prestigious profession: modern studies, possibilities to train and work all over the world.

DEGREE PROGRAMME

Duration – 6 years

Degree – MSc in Health Sciences

Qualification – Medical Doctor

STUDY PROGRAMME SUMMARY

I year

Basic Sciences: Anatomy, Human Histology and Embryology, Cell Biology, Parasitology, Genetics, Medical Physics, Medical Chemistry

II–III years

Basics of Preclinical Studies. Integrated PBL modules: Human Reproductive Health and Essentials of Clinical Studies; Immune Response and Infection; Basics of Neurosciences; Respiration and Circulation; Nutrient Uptake and Homeostasis; Basics of Preclinical Studies and Locomotion

IV–VI years

Clinical studies and Practice, Master Thesis: Clinical Modules, Internship, Master Thesis

PRACTICE IN LITHUANIA AND ABROAD

Studies of the most important clinical subjects take place in Kaunas clinics. Practical skills are gained in the hospital, through the practice of special medical modules, and in the sixth year of study – during clinical medicine practice. It is also possible to practice abroad: agreements have been signed with foreign hospitals. *ERASMUS+* and other exchange programs give possibilities to study or practice in foreign universities and clinics.

CAREER OPPORTUNITIES

After completing medical degree programme, graduates are eligible to apply for the license of a medical doctor, which allows to independently practice primary medicine or work in team with other doctors.

Take your next step in your medical career at LSMU postgraduate training which refers to a qualified physician. LSMU offers 63 accredited residency programmes to fit your specialty and interest. You can also choose a research career and continue studies in PhD.

HIGHEST QUALITY STUDIES

The curriculum of the Medicine programme is organised according to Problem Based Learning methodology and it is the most suitable modern way to reach better learning results within the field of medical education. Quality assurance at the University is based on three major aspects, namely the quality of the curricula, the competence of the teaching staff and student-oriented learning process. Curriculum is periodically analysed and updated internally, improving both content and intended learning results. Medicine programme holds external accreditation by the National Quality Agency, keeping both the curricula and teaching process in line with ESG2015 standards and guidelines for quality assurance in the European Higher Education Area. National Quality Agency is an accredited member of ENQA and assures full confidence in surveillance of quality of study process.

FACULTY OF MEDICINE

The Faculty was established in 1922. It is the largest and oldest faculty at LSMU, consisting of 34 clinical departments, 5 theoretical departments, 4 institutes and the Centre of Medical Simulation.

The Faculty of Medicine presents opportunities for students to learn about the latest developments in medicine and acquire practical skills in preparation for their practice in health care services after graduation. Well known in Europe and throughout the world the Faculty's experts in theoretical and clinical medicine share their knowledge with young enthusiastic students. Students have unique opportunities to obtain practical skills at the Hospital of Lithuanian University of Health Sciences 'Kauno klinikos'.

the Faculty of Odontology!

ODONTOLOGY

WHY STUDY IN LSMU?

The Faculty of Odontology is the largest institution of dental education in Lithuania. The Faculty has gained international recognition in education, research and clinical work.

High qualified teachers, experienced clinical instructors and most prominent researchers will help you obtain theoretical knowledge and develop clinical skills.

The students are taught in small groups, during clinical classes at individual workplaces with modern dental equipment. Internship is integrated in the curriculum.

Students association offers you extracurricular opportunities: clubs, societies, and various sport facilities.

Choose odontology if you want to restore oral health, have an independent career, earn a good salary, be creative in daily work and be a part of a team.

RESPECT LIFE

ODONTOLOGY

DEGREE PROGRAMME

Duration – 5 years

Degree – Master of Odontology

Qualification – Odontologist

WHY BE AN ODONTOLOGIST?

Odontology is listed among top jobs and together with a rewarding and challenging career you get an opportunity to help people and make them healthier, restoring teeth and making a smile beautiful, one that the patient is happy to show to others.

WHAT WILL YOU STUDY?

During the 1st year there are classes in Cell Biology and Parasitology, Physics, Chemistry, Computer Science, as well as Latin and Lithuanian languages. Human Anatomy, Human Histology and Embryology, Physiology, Oral Microbiology have a prominent place in your curriculum.

From the second year you start learning dentistry at preclinical courses of dental and oral diseases, where clinical skills are being developed in phantom head laboratories. In the third year the training is based on prevention of Dental Diseases, Prosthetic Odontology, Clinical Cariesology, Oral Surgery, as well as starting to work with the PATIENTS.

During the 3rd year you study Pharmacology, Internal Diseases, Anesthesiology and Intensive Care.

In the 4th year you start studying Paediatric Dentistry, Periodontology and Orthodontics, as well as Radiology, Otorhinolaryngologic Pathology. Clinical practice has an important role and clinical skills are developed in 5 specialized dental departments.

During the 5th year, while obtaining more advanced clinical skills, you have to do research work and defend Master thesis. Integrated internship is during 10 semester.

STUDENT MOBILITY

There are opportunities to participate in the *ERASMUS+* Academic Student Exchange Program, to acquire study, practice, linguistic and cultural experiences during part studies at universities in different European countries.

CAREER OPTIONS

After graduation you can start practicing odontology in private or community clinics. Odontologists have opportunities to own their private businesses after graduation or work as general dentists. This profession offers a wide range of clinical, research and academic opportunities at any stage of the career and possibility to shape the future of oral health care. You can continue education by entering PhD or residency studies.

MSc in Veterinary Sciences, Veterinary Doctor

360 ECTS credits

LITHUANIAN UNIVERSITY
OF HEALTH SCIENCES

FACULTY OF
VETERINARY MEDICINE

VETERINARY MEDICINE

For responsible and challenging people!

Interested in veterinary science, food production
biotechnology, safety and quality?
Welcome to the Faculty of Veterinary Medicine!

VETERINARY MEDICINE

Studies of animal structure, functions, nutrition, welfare, disease prevention, diagnosis and treatment, food safety control.

DEGREE PROGRAMME

Duration – 6 years

Degree – Master of Veterinary Sciences

Qualification – Veterinary Doctor

The program is accredited by the European Association of Establishments for Veterinary Education (EAEVE). Widely recognized diploma.

FURTHER STUDIES

Four year PhD studies or two year residency programmes (16 specializations). Residency is aimed to develop specific practical veterinary skills in narrow clinical specialization areas.

COMPETENCES

- Treat animals and prevent diseases.
- Determine the effects of drugs on animals and animal origin raw materials.
- Perform monitoring and control of animal health, welfare, infectious diseases and zoonoses, etc.
- Evaluate the safety and quality of food products and raw materials in the food chain.
- Control the safe export and import of food products.

CAREER OPPORTUNITIES

- Veterinary Doctor.
- Establishment of private veterinary clinics, employment at zoos, pharmaceutical companies, animal identification, animal disease control and other fields.
- Animal welfare inspector.
- Employment in the State Food and Veterinary Service system.
- Inspector at the state border points, etc.
- Food safety control of food and raw material companies.

STUDENT SUPPORT

University offers a well-developed support system for international students. It has been designed to make your study-abroad experience as easy and enjoyable as possible, starting from application all the way through to graduation. **MENTORING programme** – facilitates adaptation of the first-year students at LSMU through support of the experienced students who serve as mentors; **TUTORING programme** – available to any international student who wants to get help from a fellow student and study in a supportive environment; **PSYCHOLOGICAL COUNSELLING** – provides individual private consultation to students.

FOR YOUR
BENEFIT!

SOCIAL LIFE

Students participate in the activities of LSMU Student Association and Student Association of the Veterinary Academy (VASA); Lithuanian International Veterinary Student Unity (LIVSU) and International Veterinary Students Association (IVSA); in Veterinary Medicine and Food Science students scientific clubs; in Sports and Art groups.

LITHUANIAN UNIVERSITY
OF HEALTH SCIENCES

OPPORTUNITIES FOR SELF DEVELOPMENT

Real-life practice in various animal clinics, food production companies.

Joint activities with professional associations, partner universities and their departments, bringing together lecturers, researchers and students for a common activity.

There are opportunities to participate in the *ERASMUS+* Academic Student Exchange Program, to acquire study, linguistic and cultural experiences during part-studies at universities in different European countries.

FACULTY OF
PHARMACY

5 REASONS TO STUDY PHARMACY AT LSMU

PHARMACY is a profitable market sector.

PHARMACY graduates are in high demand in the job market and they successfully work in all European Union countries and in the United States.

INNOVATIVE FACULTY OF PHARMACY

Modern infrastructure.

Friendly and attentive lecturers.

Opportunity to participate in international projects, trainings, conferences.

LONG-LASTING TRADITIONS OF PHARMACY STUDENTS

Active Student Pharmacists Society.

Active Pharmacy students' scientific club, inviting all those interested in science.

Traditional student events bringing together colleagues and lecturers.

AN EXCLUSIVE AURA OF SPECIALITY

Feel the extraordinary spirit.

Get into the mysteries of science.

Be entrepreneurial.

PHARMACY

For diligent and creative people!

Want to help people? Like to communicate? Want to create a drug that cures all diseases? Always wonder what medicines your family or friends take? Interested in innovative pharmaceutical technologies?

Dream about your own company? Then, choose studies at the Faculty of Pharmacy and make your dreams come true!

PHARMACY

DEGREE PROGRAMME

The degree programme Pharmacy aims at educating high-quality pharmacy professionals by providing modern university studies in pharmacy, conducting relevant scientific research and delivering efficient practical training.

Duration – 5 years

Degree – Master of Pharmacy

Qualification – Pharmacist

YOUR CAREER

Pharmacist, researcher, pharmaceutical manager, a representative of pharmaceutical companies, pharmaceutical registration specialist, pharmaceutical technologist, analyst.

PRACTICE

You can practice in pharmacies, pharmaceutical companies, industrial pharmacies.

MODERN FACULTY & FACILITIES

The Headquarters of the Faculty of Pharmacy – The Centre for the Advanced Pharmaceutical and Health technologies 'Santaka'. You will find all the departments of the Faculty of Pharmacy, spacious lecture-rooms, the LSMU's pharmacy, study and leisure areas here, as well as a nice terrace on the 6th floor, where you can chill with your friends and admire the views of Kaunas city! The University Library is just around the corner, and favorite places in Kaunas or the University dormitory are easily accessible by well operating public transport.

SKILLS ACQUIRED

Independently produce and analyze medicinal products, provide consultations on drug usage, work in the field of drug registration, engage in scientific or educational activities.

CAREER OPPORTUNITIES

Pharmacies, pharmaceutical wholesale distribution companies, pharmaceutical research laboratories, pharmaceutical industry companies, health system and related institutions.

Approximately 95% of graduates are employed in pharmacy field 6 months after graduation!

STUDENT EXCHANGE

The Pharmacy programme students take part in *ERASMUS+* programme and each year can study at the Pharmacy faculties of EU universities in France, Italy, Spain, Germany, Finland, the Czech Republic, Poland, Hungary and others. Under individual *ERASMUS+* agreements, students can complete their practices in other continents like United States or Australia.

Those who like a meaningful way to spend the summer holidays and gain knowledge of pharmaceuticals, can join the Student Exchange Program (SEP) and spend a month in a pharmacy anywhere in the World!

INTERESTED IN THE LATEST SCIENTIFIC ACHIEVEMENTS?

Plan your research career and teaching in Pharmacy PhD programme.

LEISURE TIME

After the lectures, each LSMU student can choose many different activities. The University offers facilities for sports ranging from basketball, tennis, volleyball, athletics, swimming to badminton and chess. Student Association, student corporations, choirs, folk dance groups, Students Scientific Society are actively involved in the activities. Pharmacy Students can join the 90 years old Student Pharmacists Society: to organize social events, attend faculty events or write articles in faculty student's newspaper 'Panacea'.
