Degree Programs

2022/23

TU Dresden at a glance

30,600 students

17 faculties in five schools

126 degree programs in the academic year 2022/2023, of which 56 are undergraduate and 70 postgraduate

Degrees:

Diplom, Bachelor, Master, State Examination

Students from more than 125 countries

Research institution for over 5,000 scientists from 70 countries

Interdisciplinary networking with research facilities of the Max Planck and the Fraunhofer Society as well as the Leibniz Association and the Helmholtz Association

Environmentally-conscious and family-friendly university

Reasons to choose TU Dresden

No matter what direction you wish to take, TU Dresden offers a wide range of subjects ranging from natural sciences, engineering, transport and traffic sciences, linguistics, literature and cultural studies, business and economics, education, forest sciences, geosciences, hydrosciences, as well as computer science and medicine.

With 126 degree programs (2022/23), TUD offers a diverse scope of courses designed for a wide range of interests. By joining the 30,600 students in our student body, you will get to know many new people with various interests and personalities. And all of this is here at one of the eleven Universities of Excellence in Germany.

You can graduate from the university with a Diplom, Bachelor's degree, Master's degree, State Examination or even with an international double degree.

All degree programs are regularly evaluated to ensure their quality. TU Dresden has its own quality management for studying and teaching and is one of only few German universities to have this at its disposal.

At TUD, collaboration is a top priority: collaboration between degree programs, with external partners, and with international research teams. Students are always involved, which is characterized in particular by the high practical relevance of our degree programs.

In addition, TU Dresden promotes the achievements of its students, both before and during their studies, with a wide range of counselling and support programs.

To ensure that new students feel at ease right from the start, there is a broad range of welcome and information events. Tutors provide newcomers with help and advice and so-called buddies make it easier for exchange students to adapt to the university routine.

Small cafés, green areas, student gardens and a friendly atmosphere – the campus of TU Dresden has it all. Between the different locations (including the Medical Campus, Johannstadt and Tharandt), students can travel comfortably by bus and train with the semester ticket.

Also on technological side, TUD delivers what it promises: Together with the numerous computer labs, WiFi throughout the entire campus makes it easy to learn and work. Those seeking a quiet place with a great number of resources will find it in the Saxon State and University Library Dresden (SLUB). It is one of the largest and best-equipped academic libraries in Germany.

Nourishment for the nerves is available during the day. Eleven refectories and seven cafeterias run by the Students' Union (Studentenwerk) Dresden offer a wide selection of meal options at reasonable prices for students.

If you want to get your mind off studying for a while, you can sign up for one of the almost 60 sport courses at the Dresden University Sports Center, learn a foreign language or volunteer in one of the nearly 100 student groups.

Studies and Campus Life

Dresden is one of the most liveable cities in Germany, and is called the "Florence on the Elbe" for good reason. Relatively inexpensive accommodation and living costs contribute to this. Students can find affordable housing through the Students' Union (Studentenwerk) Dresden or on the regular housing market.

Dresden is known for its diverse cultural offers. You can visit cabarets, pubs, museums, concert halls, music festivals, as well as the theatre, opera, or cinema. You can also get active in the many sports facilities or in the surrounding nature of the Elbe landscape, the Elbe Sandstone Mountains (Elbsandsteingebirge) or the Ore Mountains (Erzgebirge).

At the same time, Dresden is the unofficial capital of student clubs, but the Neustadt area also provides a cool and exciting nightlife. If you want to venture out of Dresden, Berlin, Prague, Leipzig and Wrocław are only a stone's throw away.

Families are supported in Dresden by many offers. TU Dresden, as a certified family-friendly university, strives to offer infrastructure that supports families. Two daycare centers run by the Students' Union (Studentenwerk) Dresden help parents balance their studies and childcare responsibilities.

Student City Dresden

Applying to TU Dresden

Applications to TU Dresden are usually submitted online. Please keep the application deadlines in mind!

➤ tu-dresden.de/application

The general university entrance qualification (Abitur), the subject-related entrance qualification (only for specific subjects) or another recognized comparable university entrance qualification are prerequisites for applying for an undergraduate program. Depending on your country of origin, your secondary school-leaving certificate may not be considered equivalent to a German Abitur and it might be necessary to attend Studienkolleg and/or pass the Fest-stellungsprüfung (aptitude test) in order to study at a German university.

Please check ➤ <http://anabin.kmk.org> to find the specific requirements for your country.

A prerequisite for applying for a postgraduate program is the successful completion of university studies attested by degree. Further skills might be required. Additional information regarding the admission requirements can be found here ➤ tu-dresden.de/stdv

In addition, please note the separate registration deadlines and dates for possible aptitude tests. The registration for the 1st semester for most degree programs takes place only in the winter semester. For a few degree programs, the 1st semester can also be in the summer semester. The following pages outline the degree programs offered by TU Dresden. The degree programs are divided into six Schools:

Mathematics and Natural Sciences
Civil and Environmental Engineering
Engineering Sciences
Humanities and Social Sciences
Medicine
Teacher Training

Natural Sciences and Mathematics

-  Special NC selection procedure
-  Aptitude assessment
-  Studies can be started in winter and in summer
-  Studies can only be started in summer
-  Part-time studies possible
-  place of study Zittau
- NC Limited admission
