Welcome to Leiden University

It's great to see that you're interested in doing a Master's programme and that you're interested in our university! From a young age I was fascinated by knowledge. At school I dreamt of learning as much as I could, in as many areas as possible. My parents did not go to university but encouraged me nonetheless. Just think, with the right knowledge and skills, you too can make an impact in your community and on society.

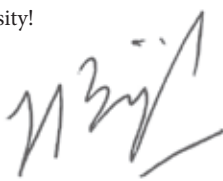

If you choose Leiden University, you will be choosing a university with one eye to tradition and the other to the future. Our lecturers and students join in the scientific and public debate, and seek answers to societal issues. With our wide range of disciplines and degree programmes, you can look beyond the limits of your own programme or choose to delve deeper into your own discipline instead. Take advantage of our broad array of specialisations, leadership programmes, research opportunities, career support and more.

In our two cities – Leiden and The Hague – you will find an inspiring community of students and lecturers from all over the world. Two different student cities with something for everyone. Leiden is a lively city with a centre full of students and a wealth of well-preserved history. The Hague is the most international student city in the Netherlands. The good thing about our Hague campus is its proximity to the politicians and organisations that are dedicated to more freedom, justice and security in the world. And regardless of whether you study in Leiden or The Hague, you will meet so many other students – from other programmes too – who will enhance your student life with their insights, experiences and activities.

Because our university community is diverse in many respects. Our students differ in their ethnicity, gender, sexual orientation, health, religion, socioeconomic background and more. Being able to be yourself is something we find very important for our academic community at Leiden University. Freedom of speech and thought are crucial to good teaching and research, hence our motto of *praesidium libertatis* or bastion of freedom. An environment that invites you to debate and ask critical questions of one another also requires you to adopt an active attitude and take responsibility.

As a student at Leiden University, you will develop your skills: not only critical thinking, independent research and problem-solving, but also 21st century skills such as leadership and entrepreneurship. So that when you graduate as an academic professional and engaged global citizen, you can help solve the challenges facing the world today.

Wishing you plenty of inspiration in finding the right programme for you, and hope to see you soon at our fantastic Leiden University!

Prof.dr.ir. Hester Bijl
Rector Magnificus Universiteit Leiden

Discover the world at Leiden University

When you choose Leiden University, you are choosing to broaden your personal and academic horizons. You will find a truly international atmosphere here, with an inspiring community of students, lecturers and professors who come from almost all corners of the world.

Excellent reputation

Our university has built a solid position of authority over four and a half centuries, and is today highly regarded, both in the academic and the professional world. Our academic staff include many top scholars with an international reputation of excellence. They provide outstanding research and teaching that makes the world a safer, healthier, more sustainable, prosperous and just place – at local, regional and global levels.

We challenge

We want our graduates to become academic professionals and engaged global citizens who contribute to solutions for the challenges facing our society. This calls for teaching that is strongly research driven, focused on active learning, stimulates the development of academic and professional skills, and offers flexibility for individual learning paths. As a student, you will have the chance to closely interact with Leiden's scholars and thinkers, conducting your own research and exploring topics that are timely and relevant.

We care

Leiden University's size allows for a both personal and engaged experience for our students. Not only will you have access to our excellent facilities, including libraries with internationally-acclaimed collections and state-of-the-art laboratories, you will also get to know your lecturers, programme coordinators and fellow classmates through discussion, debate and teamwork. We will provide an environment in which you can excel and we will encourage you to give your best!

7 Faculties

Archaeology, Governance and Global Affairs, Humanities, Law, Medicine/Leiden University Medical Center, Science, Social and Behavioural Science

34,000+

students across 2 locations

Did you know?

Leiden University stands for freedom; our motto is Praesidium Libertatis: Bastion of Freedom. In an increasingly complex world, your opinion matters. This is why we offer you freedom to think, freedom in collecting knowledge and freedom in forming your opinion.

A tale of two cities

Leiden University is located in two amazing locations. Medieval and quaint, Leiden is the founding city and heart of the university. A short 10-minute train journey away is our second home; The Hague. Our teaching and research in the international city of peace, justice and security reflect the themes that are important to this centre of government and international diplomacy.

Come to the Netherlands: the gateway to Europe

Inspiring and relaxed – these are qualities that perfectly describe the Netherlands. At the same time, there is much more to say about the country. The Netherlands is one of the safest countries in the world (Global Peace Index 2021), we are 2nd on the list of happiest countries in the world (OECD Better Life Index), and the Dutch have the best English proficiency in Europe (English Proficiency Index) making the Netherlands a perfect study destination!

Typical Dutch

Visionary architecture, cutting edge design, street markets selling rainbows of fresh flowers, *haring* (raw herring), *stroopwafels* (caramel-syrup-filled waffles), cheese, and *borrel* ('drinks') at canal-side cafés are just some of the reasons to love the Netherlands. Living in Holland means you can enjoy the culture of historical cities like Leiden, Amsterdam and Delft, while also experiencing bustling, modern and international cities like Rotterdam and The

Hague. Did you know that Holland has the largest museum density in the world? For instance, visit the Rijksmuseum, the Van Gogh Museum in Amsterdam or the Mauritshuis in The Hague. The humble bicycle is one of the favourite means of transportation in the country. A bike will most likely be among your first purchases in the Netherlands and there are over 15,000 kilometers of bicycle paths for you to discover once you get going!

Studying in Holland

The Dutch education system is interactive, student-centred and focused on teamwork, which makes it easy to meet other students. Studying in Holland means developing an open mind and increasing your international orientation. The teaching method at Dutch higher education institutions is founded on respect for each individual's opinions and convictions. This respect is a national virtue that characterises Holland's diverse and pluralistic society. The method aims to provide students with both the attention and freedom they need to develop their own opinions and creativity in applying new knowledge.

High quality education at low cost

The quality of Dutch institutions is well recognised. In addition, the tuition fees and cost of living are considerably lower than in other English-speaking countries. The Netherlands is an affordable destination.

International atmosphere

The Netherlands is the gateway to Europe. Paris, Berlin, London and Brussels are all within a few hours of Leiden University and add an additional international aspect to your educational experience. Did someone say road trip?

universiteitleiden.nl/the-netherlands

The Dutch experience

- ▶ Population: 17 million
- ▶ 100,000+ international students
- ▶ The Netherlands is home to over 200 nationalities
- ▶ Headquarters of Heineken, Shell, Philips, as well as many high-tech, legal, financial and international organisations
- ▶ The cradle of 'Dutch Design', featuring consumer articles, fashion, architecture and new media
- ▶ The birthplace of painters Rembrandt, Vermeer and Vincent van Gogh as well as modern photographers Anton Corbijn and Erwin Olaf
- ▶ A cultural hub, with nearly 1,000 top-class museums such as the Rijksmuseum and European museum of the year (2019) Boerhaave Museum (Leiden) and a wealth of festivals and concerts by world-famous musicians like (Leiden alumnus) Armin van Buuren and Martin Garrix
- ▶ A lively academic and professional landscape including many symposia and debates
- ▶ Home to star soccer players Ruud Gullit, Johan Cruyff, actresses Carice van Houten (Game of Thrones) and Famke Janssen (X-Men) as well as the creators of The Voice, Big Brother, Survivor and other popular TV shows
- ▶ Windmills, canals, cheese markets, beautiful North Sea beaches and of course, endless fields of gorgeous tulips from March until May!

Zeineb Romdhane (23)

Middle Eastern Studies

When I was choosing a study programme, I particularly wanted to do one with an international perspective. What happens beyond borders has a direct effect on everything that goes on within those borders. So I opted for International Studies. I was also interested in politics, so I chose to study Political Science at the same time, combining the two.

The university has so much to offer. When I started my master degree, there were heaps of opportunities for extra courses. I wanted to learn more and also followed courses outside my programme. And the different student organisations and associations were the perfect opportunity to get to know lots of people. That's the reason I'm an Amnesty International volunteer, for example, and why I set up a student society in 2019: the MENA Student Association. We represent people from the Middle East, organising events relating to the region and culture, and striving to offer people from this region a safe place in which they don't feel like outsiders due to their ethnicity, gender or sexual orientation.

I would describe myself as an idealist who wants to make the world a better place. You can also do that through small gestures, like helping a blind person with their shopping, for example. Eventually, I would like to be a diplomat, or fulfil my greatest ambition of becoming Minister of Foreign Affairs. Experience has taught me that whenever you open one door, another one opens too. There are endless opportunities to do things.

Even as a child I was fascinated by the universe. I often talked about it with my grandmother, and my mother kept me up to date with the latest news in the field. I can remember her telling me all about the first spacecraft that was sent to Pluto. Almost a decade later, I was watching live as the first images were sent back from the New Horizons. I got my first telescope for my 17th birthday; that was a real hit!

In Curacao, where I was born, there are no degree programmes in astronomy. As luck would have it, my secondary school organised a preparatory study trip to the Netherlands. Once I was back in Curacao, I searched the internet for further information about degree courses in astronomy. Leiden Observatory is a top institute, and that's what convinced me.

With one hundred percent focus and determination, I began the course I had always dreamt of. It wasn't easy at first, and not being in a familiar environment took some getting used to. What's more, I forgot to make time for my hobbies. Fortunately, I've picked up one of my hobbies again, writing. At the moment I'm writing for a youth magazine where I try to explain the concept of astronomy as simply as possible. It's wonderful to be able to combine my passion for writing with my degree course!

<p>137 restaurants</p>		<p>47 pubs</p>

One university, two cities: Leiden

Leiden's history

Situated at what has traditionally been an important junction where waterways and roads intersect, stands a city that will enchant you: Leiden. The city is famous not only for its university, but for its almshouses, museums and glorious history. Rembrandt was born here, and the city inspired many other influential painters. Over the centuries, Leiden continued to attract scientists, and artists. The canals, the historical buildings, the charming narrow lanes, the treasures of knowledge, culture and science: Leiden has them all for you to explore.

A student city with character

Leiden University has contributed to the city's unique atmosphere for almost 450 years. This historical city became home to the first Dutch university in 1575, and many of the university buildings are still located in the picturesque city centre. The medieval centre of Leiden is full of students, student accommodation and university

buildings. Enjoy the myriad of lovely restaurants and cafés, the venues for theatre, music and film, or the first-class museums. If you want some time off after your academic efforts, you could also take a boat trip on the canals, or spend some time in one of the city's parks. And don't forget the many trendy festivals and other cultural events that are organised in Leiden from January through December, such as the Relief of Leiden on 3 October. It's the biggest event of the year!

Small-scale and central

Leiden is a winning combination of small and fun, yet big in character as a student city. Thanks to its compact layout it's never more than a short bike ride from your accommodation to your faculty, and you're more or less guaranteed to meet someone you know along the way. What's more, it's also centrally located between the Netherlands' main cities. With a little effort, you can cycle to the beach in 30 minutes, while Amsterdam, Rotterdam

and Utrecht can all be reached within 45 minutes by train. Our second location in The Hague is only a 10-minute train ride away as well!

Innovative city

Leiden is home to the Leiden Bio Science Park, which is the location of international organisations and corporations that are often spin-offs of Leiden University research. The European Space Agency is located not far from Leiden as well.

Local and international institutions with connections to Leiden University:

- ▶ Leiden University Medical Centre
- ▶ Leiden Bio Science Park, the leading cluster for life science businesses in the Netherlands
- ▶ International Institute for Asian Studies
- ▶ The Netherlands Institute for the Near East
- ▶ The Royal Netherlands Institute of Southeast Asian and Caribbean Studies
- ▶ National Museum of Ethnology
- ▶ National Museum of Antiquities
- ▶ Naturalis Biodiversity Centre
- ▶ Netherlands Institute Morocco (NIMAR)

One university, two cities: The Hague

The Hague

Students who come to The Hague to study want to make a difference. This is the place where you can realise your ambitions – for your own future and for a better world. The Hague proudly claims the title of ‘the international city of peace, justice and security’. It is the seat of government, home of the Dutch monarchy, NATO, the International Criminal Court, embassies and consulates from around the world, plus hundreds of organisations, multinational companies, knowledge centres and think tanks.

International environment

The Hague unites countries from all across the globe and is deeply involved in building a safe and just world, with the impressive, world-famous Peace Palace at the centre of it all. It is the perfect environment to encourage dialogue and debate. You can immediately apply what you learn as a student in the international environment that The Hague offers. Attend guest lectures by highly respected experts or

intern at one of the many institutions that help to shape our world – all right in your own backyard!

A coffee with the prime minister

The Hague is home to both the government of the Netherlands and the King, so don't be surprised if you find our prime minister sitting next to you while you're having a cappuccino. If you pass by Noordeinde Palace, you can see for yourself if the King is working. Just don't expect him there on the biggest celebration of the year, King's Day. Prepare to dress in orange and celebrate with the Dutch on this day, the king's birthday!

A city full of art and culture

With the most historic sites per square metre in the Netherlands, The Hague oozes culture and history. Gazing straight into the eyes of Vermeer's *Girl with a Pearl Earring* at the Mauritshuis museum is just a beautiful, five-minute-walk away from losing all sense of

perspective at Escher in Het Paleis. Go on from there to discover Madurodam, where you'll find the whole of the Netherlands at your feet.

City by the sea

Are you more of a city person? Or more inclined to seek out nature? Why choose between city and beach, when The Hague offers both? You can even smell the sea from the heart of the historic city centre. The Hague has eleven kilometres of sandy beach within cycling distance of the historic city centre. Take in a breath of fresh air, jump on a surfboard or find a spot to relax at one of the seventy beach pavilions along the boulevard. This is the perfect place to take a breather with your new-found friends from around the world.

universiteitleiden.nl/the-hague

MUST SEES IN THE HAGUE:

Our focus on research

Our scientific research makes an important contribution to a safe, healthy, sustainable, prosperous and just world. Our research infrastructure, facilities and collections are world class. The university has 29 research institutes with 5 profile research areas, each of which collaborates across the borders of disciplines and nations. Our researchers are guided by the highest ambitions of quality and integrity, and integrate their teaching with research. Join them in pushing the boundaries of your discipline and making an impact on the world.

Combining different disciplines, Leiden University researchers work together to formulate innovative solutions to societal problems. We distinguish five broad clusters of science areas and one overarching research theme (Artificial Intelligence):

- ▷ Fundamentals of Science
- ▷ Health and wellbeing
- ▷ Languages, cultures and societies
- ▷ Law, politics and administration
- ▷ Life sciences
- ▷ Artificial Intelligence

Did you know?

- ▷ ... that the Majorana particle that is a promising building block for the quantum computer was discovered in Leiden?
- ▷ ... that Leiden Professor Caspar Reuvers was the very first professor of Archaeology in history?

- ▷ ... that Leiden researchers are constantly engaged in finding answers to the question of how we can safeguard peace and justice in our complex and globalising society?

A top-ranked university

Ever since the university's foundation in 1575, we have applied our efforts to developing, disseminating and applying scientific knowledge. Leiden University emphasises the need to continually strengthen our fundamental research and to focus on innovation, valorisation and academic entrepreneurship.

As a result of these research efforts, in addition to the quality of our teaching, Leiden University has earned its reputation as a leading university in Europe and worldwide. For many years, we've been among the leaders in Dutch university rankings and we currently feature among the top 100 universities worldwide in prominent international rankings. This will give you peace of mind that your degree is recognised around the world and can open the door to the international career you may aspire.

Overall ranking Leiden University

	14th	Most innovative university in Europe according to Reuters (first in the NL)
	71st	The Times Higher Education World University Ranking (THE)
	83rd	Shanghai Ranking (ARWU)
	131th	QS World University Rankings

universiteitleiden.nl/rankings

“The Hague is perfect. It’s small yet overwhelming in terms of the relevant organisations that are here, and also because of all the things you can do. I love running through the Malieveld or going to the Plein to have a drink or go to a club. The Hague feels very homey, I really feel I’m a part of it. On a sunny day, I go to the beach with friends.”

Vedant Mehra - International Relations and Diplomacy

Student life and support

Leiden University has a package of services available to meet your academic or personal needs. It all starts with insightful and fun introduction weeks in both Leiden and The Hague.

A great introduction

Coming to a new country to live and study is certainly exciting, but it can be daunting as well.

When you're new in Leiden or The Hague it is a good idea to register for one of the international introduction weeks at the start of the academic year. These weeks are not only functional, where you will learn about your faculty and other practical matters, but they can serve as the foundation for your social and professional network at Leiden University. They are not to be missed! Feel at home in your new city before starting your classes:

- ▶ OWL (Orientation Week Leiden): Experience everything the city has to offer, participate in fun activities and meet lots of new people. You will get to learn more about university life and organise some practical things such as getting a bike!
- ▶ HOP Week (The Hague Orientation Programme): Feel the pulse of the bustling city of The Hague! Get started with lots of fun, information on the city and the university life, as well getting to know your fellow students.

orientationweek.org
hopweek.org

How to feel at home quickly

- ▶ Join the Erasmus Student Network (ESN) Leiden or Erasmus Student Network (ESN) The Hague which organises trips, clubs, cultural events, social events and dinners, but which also helps with academic and practical questions.
- ▶ Become a member of one of the other international student clubs in Leiden or The Hague, such as Leiden United, the Association des Etats Généraux des Etudiants de l'Europe (AEGEE), or the United Nations Students Association (SIB-Leiden).
- ▶ Become a member of the Leiden University Sports Centre, and use our facilities at the USC in Leiden or the Buzz at the Beehive Student Center in The Hague.
- ▶ Follow one of the creative courses at Leiden University. LAK offers courses on dance, drama, photography, visual arts, etc.
- ▶ Attend lectures and debates on a wide range of academic topics at Studium Generale in Leiden and The Hague. They are free of charge and open to everyone.
- ▶ Download the app Uni-life to meet other students and stay up to date on the latest events.

esnleiden.com or esnthehague.nl
uscleiden.com
studyinthehague.com/fun/sport

Student well-being

The well-being and success of our students is very important to us at Leiden University. We offer students all kind of skills packages to improve study-related skills and your own wellbeing. Topics covered include time or stress management and thesis writing. This offer is varied and consists, among other things, of workshops to individual counselling. We have a number of specialised student counsellors and psychologists available. Not only can they help resolve study and personal problems, they can also assist you in legal, financial and other non-academic matters. For assistance related to your application, paying tuition, registration and other administrative help, you can find the Student Affairs Front Office in the Plexus student center in Leiden, and the Beehive student center in the Hague.

www.universiteitleiden.nl/student-wellbeing

Departmental study advisers and coordinators

Each department has its own study advisers/coordinators who can answer questions about matters that are related to the study programme of your choice. You can consult the study adviser/coordinator on issues such as timetables, exam grades, choice of subjects and application for graduation. You can find your study adviser/coordinator on the website of your study programme.

Fenestra Disability Centre

Leiden University supports students with a disability or a learning disorder so they are able to follow their chosen study programme. The Fenestra Disability Centre can assist these students with practical support and relevant information.

Read more about student support:

universiteitleiden.nl/student-support-services

Diversity and inclusion

Leiden University welcomes a diversity of staff and students and is committed to providing an open and welcoming community which enables everyone to develop their talents. The Diversity and Inclusion Expertise Office raises awareness, shapes policies and supports the university community to achieve this goal. There are also a number of networks for students and staff committed to offering a community, a safe space and events to engage in questions related to diversity: The Afro Student Association, Space to Talk About Race, the Middle East and North Africa Students Association, the LGBT+ network, the Leiden University Diversity and Equality Network, devoted to inclusive education and issues of race, and the Access and Support Network of students and staff with a disability.

universiteitleiden.nl/diversity

Student Centres

The Student Centres are home to many services that you may need to utilise during your study at Leiden University. For example, if you have any questions about enrollment, tuition fees, scholarships, exchange programmes, study delays or other study-related issues, the Student Affairs Front Office can help. You can call or walk in during office hours* to get assistance.

Admission and application for international students

Admission to master's programmes is based on several requirements. Our step-by-step guide will give you the necessary help and guidance in submitting your application.

Visa and residence permit

If you come from a non-EU/EEA country, you will need a visa and/or a residence permit. Our staff at the Admissions Office will apply for these documents on your behalf. They will contact you once you have been admitted to a master's programme, have applied for or secured accommodation, and after you have submitted proof that you have sufficient funds to support yourself during your study period.

universiteitleiden.nl/visa

Step 1. Check the admission requirements

Admission to a master's programme is specific and based on academic, programme-specific and language requirements.

Academic requirements

The minimum requirement for admission to any master's programme is a relevant BA or BSc degree (or equivalent) with good results from a recognised research university. If you do not meet the requirements, in some cases a pre-masters programme may be offered. Please note that pre-masters are not available for all programmes and not all pre-masters are taught in English. Check this on the programme's webpage.

Language requirements

As almost all master's programmes are taught in English, you will be asked to submit proof of your English proficiency. Please note that test result may not be more than two years old. Requirements vary per programme. See the website for more information. Accepted tests* are:

- ▶ International English Language Testing System (IELTS): Academic module
- ▶ Test of English as a Foreign Language (TOEFL internet-based)
- ▶ Cambridge English Exam (C2 Proficiency (CPE) or C1 Advanced (CAE)) depending on the admission requirements of the study programme

Programme-specific requirements

The entry requirements for each master's programme vary, particularly with regard to your qualifications. They may include specific academic or professional experience and motivation, or specific course requirements. You can find the details on the website of your chosen programme.

universiteitleiden.nl/admission

Step 2. Check the application deadlines

The deadlines for application for your chosen master's programme may vary, so please check your programme's webpage. The general application deadlines are:

Non-EU/EEA students, those requiring a student visa or residence permit:

- | | |
|--|--|
|  April 1
September intake |  October 15
February intake |
|--|--|

EU/EEA students:

- | | |
|---|--|
|  May 15
September intake |  December 1
February intake |
|---|--|

- ▶ You must complete a two-part application procedure: registering your application(s) in the national system Studielink and applying in Leiden University's online application portal (uSis). This means it will take at least two days to submit your complete application. *If you haven't completed these two processes before the deadline, you will miss out!*
- ▶ Scholarship deadlines are usually much earlier; take this into account when planning your application process and check the scholarship website.
- ▶ Other deadlines apply for housing: check our housing website and request housing early.

Collect the required documents

When applying for admission, you will be asked to submit a number of documents. Refer to the programme-specific information for details of the documents required by each study programme.

Step 3. Start your application

- ▶ Choose your programme, and if required, specialisation.
- ▶ Start your application in Studielink and await your activation e-mail for the Leiden University's online application portal (uSis).
- ▶ Activate your (ULCN) Leiden University account and log into our online application portal (uSis).
- ▶ Finalise your application by uploading the necessary documents and answering a few questions. The portal provides an overview of what you need to do to complete your application.
- ▶ After submitting your application, the online portal will, if applicable, ask you if you want to apply for student housing or a scholarship.
- ▶ Pay the €100 application fee, if applicable.
- ▶ The Admissions Office and the Board of Admissions at the faculty will review your application.
- ▶ You will receive the Board of Admissions decision within 6-8 weeks of the university receiving your complete application.
- ▶ You've been admitted? Accept your offer and check in the online application portal (uSis) whether you need to submit any documents to meet your conditions of admission. Instructions on how to do so will be provided in uSis.

Don't forget to:

Pay your tuition fees

Arrange tuition fee payment before the official start date of your study programme. You will receive instructions and information on payment methods by e-mail.

Prepare for your studies

Congratulations! You have completed all the steps for application and admission. Welcome to Leiden University! Have a look at our website for tips to start your studies well prepared.

universiteitleiden.nl/prepare

A woman wearing a green hijab and a light blue denim shirt is sitting on a bright yellow sofa. She is smiling and looking towards the camera. The background shows a modern interior with large windows and greenery.

After I came to the Netherlands, I decided to do a new master's programme to learn more about data science and to become a highly qualified member of related fields. I want to be a statistical consultant so I applied to the master's programme in Statistics and Data Science at Leiden University. It was a big challenge for me to adapt to the courses and a new system in a new country. However, I can say that the assigned mentor/buddy really helped me.

After three weeks studying at Leiden University, I started to experience the effect of having Leiden University on my CV and LinkedIn Profile. Without any application on my behalf, a recruiter contacted me about an internship position. That was so cool. After one semester, I am starting a 6 month internship at high-tech company ASML. Now I feel more confident about my future plans and dreams.

Esra Turkhan
Statistics and Data Science

A young man with short brown hair, wearing a dark blazer over a white shirt and light-colored trousers, is sitting on a wooden bench outdoors. He is looking directly at the camera with a neutral expression. The background shows a modern building with large windows and some trees.

Joep de Rijk
Jurisprudence and Philosophy of Law

My parents and friends weren't surprised when I chose the Master's in Jurisprudence and Philosophy of Law. I've always been someone who thinks deeply and I love reading and writing. Whatever you end up doing, the master's always has something to add. It deepens the way you look at issues. In my ideal future, I'm going to do a PhD after my master's. But I'm going to take two years for my master's degree anyway because I'm doing a year on the board of the Lipsius study association. Studying is important, but I think it's also important to get involved and develop alongside my studies. Obviously, it looks good on your CV, but for me, that's never the most important reason. Everything I do is because I like it. You shouldn't build a CV that doesn't suit you; then you put yourself on a pathway in life that won't make you happy. Honesty towards myself and the outside world is very important to me.

I specifically chose Leiden for my bachelor's degree already. Leiden University was founded in 1575 and is therefore the oldest university in the Netherlands. I think that's an interesting extra but the good atmosphere is what appeals to me most. Both the university and the city are friendly and personal. Leiden is like a village among cities. I myself come from a village, so it feels good here. Maybe I'd like to teach at the University myself later. Who knows what the future will bring?

Financial matters

Tuition fees

Your tuition fee depends on your chosen programme, your nationality (EU/EEA or non-EU/EEA) and whether you have previously completed a master's degree in the Netherlands. Please check per programme to be sure of your fee.

Cost of living

It is important to make sure that you have sufficient funds for the entirety of your studies. If you are a non-EEA student, the Dutch Immigration and Naturalisation Service will require you to submit proof of this in order to approve your visa or residence permit.

Leiden University Excellence Scholarship

This competitive scholarship programme is designed for excellent non-EU/EEA students enrolling in a master's programme and for students of all nationalities enrolling in an Advanced LLM programme or the MSc in International Relations and Diplomacy. The award can cover a substantial part of the tuition fee. Living expenses are not included in this scholarship.

Other scholarships

In addition, there is limited number of other scholarships available for students from specific regions of the world, or for specific programmes. Please check the scholarship site for details.

Loans

Leiden University accepts the US SallieMae Smart Option loan. If you have EU/EEA or Swiss nationality and are under 30, you may be eligible for a loan from the Dutch government to cover your tuition fees.

Working while studying

Do you need to find a paid job to cover some of your expenses while studying in the Netherlands? While finding employment is not impossible, it may well prove a difficult task. Working for the university is a possibility, and can be arranged through our JobMotion office. However, only a limited number of positions are available each year. Many jobs outside of the university require a good command of Dutch, and depending on your

nationality, you will face some restrictions. If you are from an EU/EEA country, from Switzerland or Japan, you will not need a work permit. All other nationalities require a special work permit and can only work for a maximum of sixteen hours a week. This information is subject to change, so check the current rules when looking for employment. All in all, we advise you not to rely on finding a paid job when financially planning your study costs.

The full list of scholarships, grants and loans for prospective students as well as a list of search engines for scholarships can be found on our website:

universiteitleiden.nl/financial-aid

Tuition fees*

	Subsidised programmes	Non-Subsidised programmes
<i>For Dutch, EU/EEA**, Swiss or Surinamese nationals</i>	€2,209***	€15,400 - €24,000

*the estimated rents are based on unfurnished rooms.

“The Hague campus of Leiden University offers a great opportunity for students or recent graduates to pursue a career in one of the many international organisations based in the city, or the private companies located in the proximity of these institutions.”

Adrian Zacharias, Germany, MA Crisis and Security Management

Housing

Universities in the Netherlands do not own the accommodation that is available to students, and as such, Leiden University cannot guarantee housing for incoming students. Most students will rent a room or share facilities in an apartment or house with fellow students. As Leiden University is an urban campus, student housing is spread throughout the cities of Leiden and The Hague, as well as the surrounding areas. The cities themselves are our campus. Finding accommodation in either city can be difficult. We recommend that you start your search as soon as you can, as it is your responsibility to find a room prior to your arrival. There are two main ways to find accommodation:

Find housing the Dutch way!

House hunting in the Netherlands can be challenging, so we strongly recommend starting as early as possible. You may be unfamiliar with procedures and prices; websites and advertisements are often in Dutch. On our Finding housing yourself webpage you can access up-to-date information, intended to help international students to find accommodation and avoid possible pitfalls. You can independently look for housing via private landlords or housing associations. There are a number of housing organisations that can assist, such as DUWO. Social media platforms are also a good source to help find options and possible roommates. The housing website offers a list of tips and tricks for finding housing on your own.

Housing Office

You can also apply for a housing offer through the university Housing Office. The Leiden University Housing Office reserves a limited number of rooms each year for international students who apply early enough. Here you will be assisted in finding accommodation in Leiden or The Hague. Accommodation ranges in location, size, number of people with whom you share facilities and rental fees. Our advice: due to limited availability, the university cannot guarantee accommodation to all students who request housing. Accommodation is allocated on a first-come first-served basis, according to the date we have received the housing fee, so request housing early and pay the housing fee! There's no need to await the outcome of your application for admission.

🔗 universiteitleiden.nl/housing

🔗 universiteitleiden.nl/residence-life-programme

Residence Life Programme

In a number of housing locations there are Residence Assistants (RAs) to help international students feel at home in Leiden and The Hague. They aim to bring students together, create a sense of community and foster a safe and tolerant living environment. They also offer support in practical and personal matters, and can refer you to Leiden University's wide range of professional support staff if required.

Looking for a Challenge

Leiden Leadership Programme (ILLP)

The LLP provides participants with the necessary knowledge, insights, and skills about leadership to enhance the impact they have on society. The programme runs from November to June and is open to master's students from our university as well as Delft University of Technology and Erasmus University Rotterdam. This intensive extracurricular course is done alongside the regular master's programme and requires substantial motivation and dedication. Students who are admitted, learn how to make an impact through lectures by scientists and professionals in the field, skills training, and a practical assignment. The latter enables participants to tackle a topical problem put forward by the LLP's partner organisations. This programme invites applications from both Dutch-speaking and international students.

🔗 universiteitleiden.nl/LLP

Dual master's programme

This involves embarking upon two different university degrees at the same time. They can be complementary, or, they can be very different from one another. However, it is crucial that you obtain approval of the faculties involved. Please note that there may be an additional tuition fee involved.

Research master's programmes

Most faculties offer two-year research master's programmes, which are more intensive than the regular master's programmes. They are designed for highly motivated students, and are a good preparation for a PhD study.

Advanced master's programmes

The Leiden University Law School offers these in-depth programmes which cover a specific area of legal expertise. Designed for excellent students with legal experience and qualified lawyers who wish to enhance their career prospects, classes are small and students benefit from close contact with professors and expert practitioners from the relevant legal field.

🔗 universiteitleiden.nl/en/law

Study or internship abroad

Some programmes may allow you to follow a study abroad or internship abroad. This is an extra challenge for the most qualified students.

If you choose to do an internship or to follow part of your Leiden study programme outside of the Netherlands, you may be eligible to apply for a grant covering part of the costs. This is possible through the Erasmus+ scheme for study, research or a traineeship in a European country, or through Leiden University Lustra+ scheme. Lustra+ is intended for study, internship or research at an institution or in a company outside Europe.

Non-Degree and Study Abroad/Exchange

If you are currently enrolled at one of Leiden University's partner institutions, you can apply for an exchange semester/year in Leiden. This has the advantage that you will pay tuition fees only at your home university. Leiden University participates in the Erasmus+ programme and the International Student Exchange Programs (ISEP). In addition, we have bilateral agreements with over 70 distinguished partner institutions. Leiden University currently offers exchange opportunities in nearly 20 fields.

We recommend that you contact the exchange (or study-abroad) coordinator at your home institution to determine whether you are eligible to participate in an exchange programme.

Study Abroad

If there is no exchange agreement between Leiden University and your home institution, you have the option to apply for a Study Abroad programme for one or two semesters instead. Within this context, you will be able to create your own programme or choose a selection of courses taught in English to match your academic background and interests. Alternatively, you can also participate in programmes that are especially tailored for students with a particular interest

in law, Dutch language and culture, or biomedical sciences. Leiden University does charge tuition fees for these programmes.

universiteit.leiden.nl/exchange

Summer Schools

Leiden University offers a number of international summer schools that vary in terms of the field of study, aim, subject, duration and academic level of participants. A basic knowledge of the field of study is required, so it is best to check all requirements.

universiteit.leiden.nl/summer-schools

Massive Open Online Courses (MOOCs)

Leiden University offers a selection of Massive Open Online Courses taught by renowned lecturers and professors. These courses are provided through Coursera, an education platform that partners with top universities and organisations worldwide. MOOCs are free and can be taken by anyone who is interested.

universiteit.leiden.nl/moocs

After your master's

With its international reputation of excellence, Leiden University offers its graduates a first-class starting position on the job market. In addition, we are committed to supporting you in building the skills needed to take your career in the right direction.

Career Services

Our study and career counsellors provide advice and information on planning the next steps in your career. You will have access to our workshops and web-based resources, which include career step plans, job seeking strategies and self-assessment tools. If you prefer a personalised approach, you can make an appointment for an individual counselling session with your departmental career counsellor. Additionally, each of Leiden's seven faculties has its own career services department, which embody specific expertise and resources related to the faculties' programmes. These services are open to students and to alumni for a maximum of one year after graduation.

Academic and professional network

Leiden University's lecturers and professors have an extensive network in their field of expertise. Their connections may range from international or national corporations and organisations to international universities and research institutes. Access to this network can prove useful when you are ready to take your next career step.

Internships and jobs

An internship can be a good way to explore the job market and to get an insight into a specific organisation or job. Also, working as an intern can help you to expand your professional network. Our career counsellors can support you in applying for internships and jobs and can provide you with information about pursuing a career both in and outside the Netherlands.

universiteit.leiden.nl/careerzone

Orientation Year for non-EU/EEA students

Did you know that after obtaining your master's degree, you are able to stay in the Netherlands to explore your options on the Dutch labour market? This is possible through a special one-year permit called the Orientation Year. Knowledge and talent are welcome in the Netherlands to strengthen our competitive position and knowledge-based economy. All candidates have

three years after graduation or finishing research to apply for the Orientation Year.

Alumni

After graduating and participating in the centuries-old tradition of signing 'het Zweetkamer'tje' (the Sweat Room) wall, you will become an alumnus. Leiden University is proud of her alumni. They contribute in many different ways to the growth and development of the university. The university also offers several services to contribute to its alumni's ongoing personal and professional development. For example, our alumni have lifetime access to the Leiden University Libraries free of charge, providing you with access from home to the newest studies and publications to keep your knowledge up-to-date or to dive into completely new subjects.

Mentor Network

Leiden University's alumni hold positions in a vast range of sectors, all over the world. As such they are good resources for graduates who are just starting out on the job market. Through the Leiden Alumni Mentor Network you can contact Leiden alumni online and ask them for advice.

universiteit.leiden.nl/mentor-network

From New York to Tokyo

The university organises events for alumni all over the world. Leiden professors and other representatives meet up with alumni to catch up, to discuss developments in Leiden and to network. Around 26 November, Cleveringa Meetings take place at more than 40 locations throughout the world and are a great way for alumni to strengthen the connection with their alma mater and meet other alumni who work and live in their country.

More information on our alumni services can be found here:

universiteit.leiden.nl/en/alumni

Faculty of Archaeology

Leiden’s Archaeology master’s programmes are the broadest programmes of their kind in the Netherlands. Leiden is the only place in the Netherlands that has an independent Faculty of Archaeology. The Faculty consistently ranks in the global top 10 in the QS World University Ranking.

The programme offers various specialisations and regional focus areas. You may choose to focus on regions like Europe, the the Mediterranean and West Asia or the Americas. The teaching programme is closely linked to ongoing, state-of-the-art research. Our academic staff are involved in research all over the world, with a strong focus on field research. In addition, the programme emphasises ecology and geology, combined with both iconology and historical studies, as well as ethno-archaeological, anthropological and experimental approaches. The possible combination with modern museum practices and developments of archaeological heritage management broadens the scope even more.

 TOEFL (internet-based) 90 for each component.
 CPE or CAE 180 (176 for each component).

masters.universiteitleiden.nl/csm

Cyber Security

ENGLISH START FEBRUARY 1,5 - 2 YEARS THE HAGUE

The Executive Master’s in Cyber Security is a multidisciplinary programme that focuses on the technological as well as the legal, administrative, economic and psychological aspects of digital security. The programme has been developed by Leiden University, Delft University of Technology, The Hague University of Applied Sciences and various private partners.

Career

Graduates work in the field of cyber security either in private, public, or semi-public companies.

Best preparatory degree

A completed master's degree from a university (of applied sciences) in a relevant discipline, as well as several years of relevant professional experience.

English proficiency**

Adequate proficiency shown through motivation letter, English CV and intake interview.

masters.universiteitleiden.nl/cybersecurity

International Relations and Diplomacy

ENGLISH START SEPTEMBER 2 YEARS THE HAGUE

This Advanced programme is taught jointly by the Institute of Security and Global Affairs, the Institute of Political Science and the Netherlands Institute of International Relations Clingendael. This highly selective programme is a unique combination of academic education in international relations and political science, featuring practice-oriented courses and training in international negotiations and diplomacy. Each year, this programme selects a limited number of students from all around the world and the advantage of being in The Hague, the international city of peace and justice, is an additional asset.

Career

Career options include international diplomacy, government and non-governmental organisations, national or international public administrations, 'think tanks' and research institutions, international interest associations or international business.

Best preparatory degree

A bachelor's or master's degree in political science, international relations, international law, public administration, economics, sociology or history.

English proficiency**

IELTS: 7.0 / TOEFL: 100 / Cambridge C2 Proficiency, or C1 Advanced: 185
Adequate proficiency shown through motivation letter, English CV and two references.
The deadline for this programme is 1 April for all students.

masters.universiteitleiden.nl/ird

Management Public Sector

DUTCH START SEPTEMBER FEBRUARY 1 YEAR THE HAGUE

In this programme you learn to analyse and address key societal challenges of the public sector, using multiple perspectives and paying special attention to competing values and interests. Located in The Hague and connected with various (inter) national (non)governmental organisations, the programme offers two tracks. Whereas the Governance and Consulting track takes off from a practice-oriented position and works towards analysis and reflection, the Politics, Policy, and Management

track starts with academic analysis and reflection to work towards practical applications.

Specialisations

- Governance and Consulting (evening)
- Politics, Policy and Management (daytime)

Career

This programme prepares you for a career as a professional in the (Dutch) public sector.

Best preparatory bachelor's

A bachelor's degree in public administration or a closely related discipline, such as political science.

Dutch proficiency

TUL-Advanced Dutch

masters.universiteitleiden.nl/management-public-sector

Public Administration

ENGLISH START SEPTEMBER FEBRUARY 1 YEAR THE HAGUE

The central question within this master's is: how to address the world's most pressing policy challenges from a governance perspective? The Master's in Public Administration gives you a unique multi-level perspective on managing policy challenges in their complex societal setting where multiple actors, interests and policy areas intertwine. The three specialisations focus on an economic, international, and organisational approach of governance.

Specialisations

- Economics and Governance
- International and European Governance
- Public Management and Leadership

Career

This programme prepares students for managerial and (policy) advisory positions in the public domain as well as for policy-related jobs in the private and non-governmental sector.

Best preparatory bachelor's

A bachelor's degree in public administration or in a closely related discipline, such as political science, public management, public policy, economics, business management, and sociology.

English proficiency**

IELTS; overall 7.0 with minimum band scores reading 6.5, listening, 6.5 speaking 6.5 and writing 7.0.
TOEFL: IBT 100 (internet-based) with minimum band scores 22 reading, 22 listening, 22 speaking and 25 writing.

masters.universiteitleiden.nl/public-administration

***The Technical Track is only offered when a minimum of 5 students participate in this track.

Faculty of Humanities

In this era of globalisation, humanities are more important than ever. Migration, integration, trade, and technology are blurring the borders between countries and cultures. To be able to cooperate and live together, it is crucial that we understand each other. Humanities offer the insights we need to do this.

The Faculty of Humanities in Leiden is unique in its breadth of languages, cultures, arts and societies of the world, in their historic context, from prehistory to the present. We offer a challenging and international study environment in which research and education are closely intertwined. The master's programmes we offer are often small-scale and we provide room for customisations such as personal learning trajectories.

Humanities research and education at Leiden are among the top 30 in the world (THE).

African Studies

ENGLISH START SEPTEMBER 1 YEAR LEIDEN

This multidisciplinary programme offers ambitious students the opportunity to explore the African continent from a wide range of perspectives: historical, literary, cultural, socio-economical and political. A three-month internship at an organisation of your choice in Africa will give you the chance to gain invaluable cultural and professional experience.

Career

Your degree prepares you for roles in cultural organisations, education, policy-making, tourism, development, publishing, public relations, and journalism.

Best preparatory bachelor's

A bachelor's degree from a university, equivalent to the level of a Dutch academic bachelor's degree. Knowledge, understanding and skills comparable to those acquired upon graduating from the Bachelor's programme in African Language and Cultures at Leiden University.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/african-studies

African Studies (Research)

ENGLISH START SEPTEMBER 2 YEARS LEIDEN

The programme is unique in continental Europe for the interdisciplinary range of subjects offered and the variety of perspectives. Within the Research MA you will focus on developing your research skills, and you will have an entire year (including six months consisting of fieldwork) to execute your own research project. This offers you outstanding opportunities to get insights into working and conducting research in Africa and to enhance your job prospects.

Career

Having successfully completed the research master's programme, you will be qualified to undertake PhD research or work at research institutes, or work as a policy maker, journalist, or practitioner for Africa oriented organisations worldwide.

Best preparatory bachelor's

A bachelor's degree in the field of African languages and cultures, (African) linguistics, history, cultural anthropology, literature, sociology, political sciences, public administration or other studies related to the social sciences.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/russian-and-eurasianstudies

Leiden Law School

With its international focus and roots going far back in the Dutch legal order, the faculty has helped to train many generations of legal professionals for key positions within a society governed by the rule of law. The research of the faculty is not restricted to just one core issue, but aims at excellent cutting-edge research across the full breadth of law. Each year more than 1,000 Bachelor students choose to study Law, Notarial Law, Tax Law or Criminology here. Besides these students, around 600 to 700 international students come to our law school: ranging from exchange students who are here to study for one semester in Leiden, to students who have completed their undergraduate studies and have been selected for one of our (advanced) Master's programmes. These figures say a lot about the scale of our law school. But they also demonstrate the attraction our law school has for talented legal professionals and criminologists – both at home and abroad.

Leiden Law School

1	year master's programmes
2,228	master's students
20%	international master's students (95% in Advanced LL.M. programmes)
80	nationalities
€2,209	EU/EEA student tuition fee*
€19,300	Non-EU/EEA student tuition fee

The Advanced LL.M. programmes are not subsidised by the Dutch government. For these programmes an institutional tuition fee applies. The tuition fee for the Advanced LL.M. programmes for all students is €19,300 (€9,650 Advanced LLM programmes - part-time)

* This tuition fee is per year and only applies if this is your first master's programme in The Netherlands

** English language proficiency requirements are subject to change. Please check our website for the updated English language proficiency requirements. You can find the exact language requirements and more detailed language requirements per programme under each programme description. Also check our website for detailed information on the types of English tests accepted and the equivalent scores for IELTS, TOEFL and Cambridge English tests.

NOTE: Tuition fees are subject to change. Please check online our updated tuition fees.

Air and Space Law (Advanced LL.M.)

ENGLISH START SEPTEMBER FEBRUARY 1 YEAR LEIDEN

The LL.M. programme in Air and Space Law combines public air law, private air law and space law. It has a clearly defined European and international dimension, making it unique in the world. In this intensive one-year master's programme, you will gain a solid legal foundation in this exciting field, learning from some of the foremost experts in academia and legal practice.

Career

Many of our graduates find positions in law firms or consulting firms with an aviation and space law practice, legal departments of airports, airlines and aerospace companies, civil aviation authorities, ministries of transportation, space organisations like the European Space Agency and academia. With the liberalisation of the European aviation laws and the growing number of actors operating in outer space, the already high demand for experts in this field is only expected to increase.

Best preparatory bachelor's

A full law degree (offering access to legal practice) with sufficient knowledge of international law. Some prior knowledge of Air and Space Law is certainly an asset, but is not compulsory. In addition, candidates for the blended learning version of the Advanced Master's programme must have at least five years of professional experience in the field of air and/or space activities, as the programme is specifically designed for experienced professionals.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/asl

Child Law / Jeugdrecht

DUTCH START SEPTEMBER FEBRUARY 1 YEAR LEIDEN

This programme is unique in the Netherlands. It offers an insight into the social and ethical context in which juvenile law is developed and expressed. You will gain knowledge about the foundations and principles of children's rights from a human rights perspective, and about the national and international origin of these foundations and principles. Particular attention is paid to the influence of international human rights. The teaching is closely linked with practice and there is a strong focus on current events.

Career

The programme offers a broad basis for lawyers who wish to specialise in the legal profession, the judiciary, the Public Prosecution Service or other ministries. Options also include positions at the Child Protection Service, the

Council for Child Protection, the government, interest groups, or research positions at universities or private institutions.

Best preparatory bachelor's

A bachelor's degree in law or notarial law from a Dutch university.

masters.universiteitleiden.nl/child-law

Crime and Criminal Justice (MSc)

DUTCH ENGLISH START SEPTEMBER FEBRUARY 1 YEAR LEIDEN THE HAGUE

Detecting and combatting crime is becoming increasingly complex. Security is high on the national and international agenda. This master's programme provides the skills to face these challenges. You can choose the specialisation Comparative Criminal Justice that explores contemporary criminal justice developments and challenges from legal and criminological perspectives. It is unique in its cross-national and multidisciplinary scope. Or choose the Dutch specialisation Criminology and Security Policy that explores contemporary criminal justice developments and challenges from a criminological, sociological and public policy perspective. It focuses on security and crime issues in the Netherlands and the development of effective and legitimate policy in order to tackle these issues.

Specialisations

- Comparative Criminal Justice (in English, in Leiden)
- Criminology and Security Policy / Criminologie en Veiligheidsbeleid (in Dutch, mainly in The Hague)

Career

Graduates of Comparative Criminal Justice end up in law(-related) professions, (international) criminal justice organisations, research, teaching, and roles related to policy-making and policy-advice. Graduates of Criminology and Security Policy end up as crime and security advisors, researchers or policy officers (public order and safety) at ministries and municipalities; the police; organisations that are involved in research into and tackling crime and safety.

Best preparatory bachelor's

A bachelor's degree in Criminology or other social sciences discipline, or a bachelor's degree in law.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100 (only applicable to Comparative Criminal Justice)

masters.universiteitleiden.nl/crime-and-criminal-justice

European and International Business Law (Advanced LL.M.)

ENGLISH START SEPTEMBER 1 YEAR LEIDEN

As the EU passes a growing number of economic regulations, these mandates increasingly interact with global trade regulations and with those of its Member States. Businesses that operate internationally are faced with various layers of jurisdiction that sometimes have an unclear hierarchy. In the European and International Business Law programme, you will learn how to decipher the complex hierarchy of European and international business law.

Career

Most of our graduates go on to careers in international departments of law firms, international businesses, international bureaus of government service or other international organisations. More specifically, our alumni have found jobs working with judges' cabinets at the European Court of Justice in Luxembourg, directorates of the European Commission, Ministries of Foreign Affairs, the World Trade Organization. They have also been selected for PhD and research positions at the most prestigious academic institutions, including the European University Institute in Florence.

Best preparatory bachelor's

A full degree in Law (offering access to legal practice in the country where it was obtained) from a recognised University/Law School.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/eibl

European and International Human Rights Law (Advanced LL.M.)

ENGLISH START SEPTEMBER 1 YEAR LEIDEN

Human rights are at risk in all societies. Though various national, regional and international human rights instruments have been developed to protect the human rights of all people, some of these are more effective than others in particular situations. In the European and International Human Rights Law programme, you will compare the functionality of different protection mechanisms that are currently in place.

Career

Our graduates have gone on to careers with judges' cabinets at the European Court of Human Rights in Strasbourg, the Court of Justice of the European Union in Luxembourg, the International Court of Justice in the Hague, cabinets of Commissioners of the European Commission in Brussels, diverse sections of the Office of the High Commissioner

for Human Rights in Geneva, the UN High Commissioner for Refugees, the International Committee of the Red Cross, national and international NGOs, the civil service in their home countries, law firms. Many of our graduates have also become human rights researchers and scholars.

Best preparatory bachelor's

A full degree in Law (offering access to legal practice in the country where it was obtained) from a recognised University/Law School.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/eihrl

Forensic Criminology / Forensische Criminologie

DUTCH START SEPTEMBER FEBRUARY 1 YEAR LEIDEN

This programme focuses on the use of specialist expertise in criminal justice, taking a practical approach. Courses include Forensic Identification Methods, Crime Analysis, Forensic Accountancy and Forensic Psychiatry. The programme includes a compulsory internship, linked to the MA thesis.

Career

Positions as advisers, researchers or policy officers at such organisations as the police, the Public Prosecution Service, legal institutions and services, penitentiary institutions, rehabilitation agencies, victim support organisations and universities.

Best preparatory bachelor's

A bachelor's degree in criminology or law or social sciences with criminology as specialisation.

masters.universiteitleiden.nl/forensic-criminology

International Children's Rights (Advanced LL.M.)

ENGLISH START SEPTEMBER 1 YEAR LEIDEN

The programme offers a multi-layered study (covering international, regional and national legal systems), as well as an interdisciplinary scope, to examine the most relevant issues impacting children worldwide. What are the rights of the child when it comes to forced marriages or protection against violence or exploitation? What rights do refugee children have in their host communities? How do we balance between the rights of children, parents and the state? And how can children's rights be legally enforced in various countries across the globe?

Career

Our graduates can go on to positions in governmental and inter-governmental bodies and public administration (both national and international); national, regional and international (non-

governmental) organisations dealing with children's rights issues; the judiciary; national human rights institutions (e.g. ombudspersons); civil society organisations dealing with children's rights issue; monitoring and advisory national and international bodies or law firms or companies involved with children and/or family matters.

Best preparatory bachelor's

A full degree in Law offering access to legal practice in the country where it was obtained or an equivalent degree from a recognised University/Law School; or a degree at an equivalent level in another discipline with a sufficient background in or understanding of law.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/icr

International Civil and Commercial Law (Advanced LL.M.)

ENGLISH START SEPTEMBER 1 YEAR LEIDEN

Globalisation and increasing international trade have led to the rapid internationalisation of civil and commercial law, thus forming a complex and multi-layered discipline. Leiden University's International Civil and Commercial Law programme deals with different levels of international, EU and national laws as they coexist and interact with one another.

Career

Our graduates go on to work at organisations such as private law firms, multinational companies, international courts, governmental organisations and research institutes. Many of our graduates also contribute to legal scholarship in international civil and commercial law by pursuing postgraduate or PhD research.

Best preparatory bachelor's

In order to qualify for admission to the Master of Laws Advanced Studies in International Civil and Commercial Law programme, you should have a full degree in Law offering access to legal practice in the country where it was obtained, or an equivalent degree from a recognised University/Law School, evidence of excellent academic performance, illustrated by way of an academic transcript and sufficient academic background in the area of international civil and commercial law.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/iccl

International Dispute Settlement and Arbitration (Advanced LL.M.)

ENGLISH START SEPTEMBER 1 YEAR THE HAGUE

Leiden University's Master of Laws in Advanced Studies in International Dispute Settlement and Arbitration (LL.M.) is a high-level postgraduate programme on the theory and practice of international dispute settlement and arbitration in international law.

Career

This programme is designed to provide you with the analytical, research and presentation skills necessary to pursue a career in the field of international dispute settlement. As a graduate, you will be qualified for positions such as law firms, in-house counsel, international courts and tribunals, arbitration institutions, international organisations, state and governmental agencies, non-governmental organisations and academic and research institutes.

Best preparatory bachelor's

A law degree that gives access to the legal professions in the country where the degree was obtained. Graduates from fields other than law may also be admitted, provided their previous studies and/or professional career included a substantial legal component. Students should also demonstrate a sufficiently high performance in their previous studies, validated by marks on their University Degree/Transcript and the accompanying mark criteria, and letters of recommendation from current or previous professors and/or employers.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/idsa

Law / Rechtsgeleerdheid

DUTCH/ENGLISH START SEPTEMBER FEBRUARY 1 YEAR LEIDEN

In the master's programme in Law the different main areas of law are explained in relation to each other. You also follow in-depth courses in the particular field of law you have chosen. You won't be sitting passively in class, though: in the practicum and the privatissimum you prepare actively for professional practice.

Specialisations

In English

- European Law
- Public International Law

In Dutch

- Civil Law / Civiel Recht
- Company Law / Ondernemingsrecht
- Constitutional and Administrative Law / Staats- en bestuursrecht

- Criminal Law and Criminology / Straf- en strafprocesrecht
- Financial Law / Financieel Recht
- Jurisprudence and Philosophy of Law / Encyclopedie en filosofie van het recht
- Labour Law / Arbeidsrecht

Career

In this master's programme you are prepared as best as possible for professional practice. Many of our lecturers come from professional practice. Much attention is paid in the master's programme to the training of academic skills which are also of great value in practice. You take part in debates, carry out legal research, write papers and hold presentations.

Best preparatory bachelor's

A Bachelor's in Law (LL.B.) or a Postgraduate Diploma in Law from a recognised university; in exceptional cases a bachelor's degree in a related discipline (e.g. in Political Science or equivalent) will be acceptable, provided that a substantial number of law courses are included in the bachelor's programme.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/law

Law & Finance (Advanced LL.M.)

ENGLISH START SEPTEMBER 1 YEAR LEIDEN

In today's interconnected world, national and international financial markets have far-reaching effects on organisations and individuals around the globe. That is why the financial sector is becoming increasingly regulated, leading to a growing need for specialists who work at the intersection of law and finance. In the Law & Finance programme, you will be specially trained to excel in this global and multidisciplinary field.

Career

The Law & Finance Advanced Studies programme is optimally designed to suit requirements for both national and international professional positions. When you graduate, you will be qualified to work in a wide range of organisations such as financial institutions, such as banks and investment firms, European and national financial supervisory authorities, other governmental and inter-governmental bodies and public administration, law firms, judiciary and arbitration courts, companies and academic and research institutes.

Best preparatory bachelor's

A full degree in law offering access to legal practice in the country where it was obtained, or an equivalent law degree from a recognised University/Law School or a degree at an equivalent level in another discipline such as economics or business administration, with a sufficient background

in law evidenced by, for instance, certificates of courses in law successfully concluded or substantial professional legal experience. Evidence of excellent academic performance by way of an academic transcript.

Law and Digital Technologies (Advanced LL.M.)

ENGLISH START SEPTEMBER 1 YEAR LEIDEN

Technology has become an important issue in almost every area of national and international law practice. Today, people are constantly confronted with concerns of privacy, personal data protection, cybercrime and cybersecurity. New uses for technology are often developing more rapidly than the law itself, creating interesting challenges for legal professionals and scholars. This programme will equip you with both theoretical knowledge and professional skills necessary to thrive in an interdisciplinary, global environment.

Career

The Law and Digital Technology programme prepares you for a variety of successful careers in an ever-advancing global field. Our alumni have gone on to careers at international law firms, tech companies, the judiciary, governmental institutions, NGOs, academic and research institutions.

Best preparatory bachelor's

A full degree in Law offering access to legal practice in the country where it was obtained, or an equivalent or relevant degree from a recognised University/Law School; evidence of excellent academic performance, illustrated by way of an academic transcript; sufficient academic background in the area of law and digital technologies.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/ldt

Law and Society

ENGLISH START SEPTEMBER 1 YEAR LEIDEN THE HAGUE

Law and legal institutions play an important role in the organisation of society. They can be used to address and regulate social problems, such as pollution and climate change, migration and terrorism, corruption, and gender equality. But laws and institutions, and the way in which they operate in action, can also preserve and deepen societal problems and lead to injustice. Our Master's programme Law & Society offers a unique opportunity to study the dynamic relationship between legal norms and social reality.

Career

Experts from the professional field have expressed a need for students trained in an interdisciplinary, socio-legal approach to law, with an in-depth understanding of the formation and functioning of law. Career prospects that students should think of when choosing this master are intergovernmental organisations, national and European Union civil services, academia, lobby and consultancy firms and large corporations.

Best preparatory bachelor's

A bachelor's degree in Law or Social Sciences or a bachelor's degree from a University College or another discipline related to law and justice.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/law-and-society

Notarial Law / Notarieel Recht

DUTCH START SEPTEMBER FEBRUARY 1 YEAR LEIDEN

This programme is intended for students who wish to pursue a career as a notary. It focuses on the foundations of property law and the social role of the notary in applying and implementing civil and tax law.

Career

The majority of our graduates enter notarial practice. Other options include government posts, the business sector, the real estate sector and the bank and insurance sector.

Best preparatory bachelor's

A bachelor's degree in notarial law, preferably from Leiden University.

masters.universiteitleiden.nl/notarial-law

Public International Law (Advanced LL.M.)

ENGLISH START SEPTEMBER 1 YEAR LEIDEN THE HAGUE

In this advanced master's programme, you will gain a thorough understanding of the legislation that governs international relations in an increasingly complex global society. You will learn in-depth about a wide range of aspects that affect our world, in addition to getting the opportunity to specialise your area of study.

Specialisations

- Peace, Justice and Development
- International Criminal Law

Career

As a graduate, you will be qualified for a range of positions within organisations such as international courts, international organisations, national judicial institutions, non-governmental organisations, the foreign service, prestigious law firms, academic and research institutes.

Best preparatory bachelor's

A full degree in Law (offering access to legal practice in the country where it was obtained), or equivalent degree from a recognised University/Law School, with evidence of excellent academic performance illustrated by marks on university transcript, and relevant experience related to public international law.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/adv-pil

Tax Law / Fiscaal Recht

 DUTCH  SEPTEMBER
START FEBRUARY  1 YEAR  LEIDEN

Tax systems are changing constantly. And we are all affected - personally, or from a business point of view, and often at crucial, defining moments in time. Do you want to get to grips with legal texts and tax issues? Do you enjoy working with people and can you explain abstract matters clearly? Are you interested in politics and society? Then this master's programme is for you.

Career

Many Leiden graduates of the master's programme in Fiscaal Recht (Tax Law) find suitable employment within six months. We can help with our online mentor network and personal careers guidance.

Best preparatory bachelor's

A bachelor's degree in Tax Law from a Dutch University

masters.universiteitleiden.nl/tax-law

Faculty of Medicine/ LUMC

The Faculty of Medicine is part of the LUMC, the Leiden University Medical Center for research, education and patient care and has high quality profile with a strong scientific orientation. Located at the Leiden Bio Science Park, the LUMC acts as a knowledge centre on topics in the field of public health, and it acts as a regional centre for education and training of medical professionals. The Faculty of Medicine offers five master's programmes.

Biomedical Sciences

 ENGLISH  SEPTEMBER
START FEBRUARY  2 YEARS  LEIDEN

In this two-year programme you are trained in interdisciplinary approaches to address scientific and societal challenges in the field of (bio)medical sciences. The research in this programme is related to the maintenance of health and prevention of disease. The first year provides you with a solid background in Biomedical Sciences via compulsory and elective courses and a research internship. The second year is dedicated to one of the following specialisations

Specialisations

- Communication
- Education
- Management
- Research

Career

You will acquire a skill set suitable for a wide range of career opportunities not only in (biomedical) research, but also in industry, policy making and communication/ education.

Best preparatory bachelor's

A bachelor's degree in Biomedical Sciences or equivalent Visit our website for our specific entry requirements and admission procedures.

English proficiency**

IELTS: each test component must score a minimum of 6.0; with an average score of at least 6.5; TOEFL internet-based: an overall score of 90, each test component must score a minimum of 22.

masters.universiteitleiden.nl/bms

Medicine

 DUTCH  SEPTEMBER  3 YEARS  LEIDEN

During this three-year master's programme, students learn how to cure patients, prevent diseases and develop a critical scientific view. A large part of this programme consists of internships. In Leiden, students are able to choose in which discipline they want to perform the semi-practitioner's internship, science internship or elective internship. This enables them to pre-determine the focus of their third master's year.

Career

Most medical doctors from Leiden University pursue a career in a medical specialty. In this case you will work and learn at the same time. Specialisation (residency programme position) can take two to eight years, depending

on the specialty. Another option is to pursue a PhD. This means you will be conducting research at a university or university hospital for a maximum of four years, while being trained as an independent researcher. After obtaining a PhD degree, most graduates apply for a residency programme position. In addition, you can work, for instance, as a researcher, as a doctor not in training in a hospital or in the pharmaceutical industry.

Best preparatory bachelor's

This programme is intended for students with a Leiden bachelor's diploma in Medicine.

masters.universiteitleiden.nl/gnk

Pharmacy

 DUTCH  SEPTEMBER  3 YEARS  LEIDEN

The programme in Leiden focusses on the future of pharmaceutical care. In three years you will become a pharmacist with focus on the multidisciplinary approach of the latest developments in pharmaceutical products and patient care. The programme prepares you to work as a full member of the team of health care practitioners.

Career

Most graduates provide pharmaceutical care in community or hospital pharmacies and continue to specialise in these directions. Other graduates conduct research or pursue a career in the pharmaceutical industry or as a policy maker. In general, job perspectives for pharmacists are good.

Best preparatory bachelor's

A bachelor's degree in pharmacy from a Dutch university, a bachelor's degree in pharmacy from Leuven or a bachelor's degree in biopharmaceutical sciences with the pharmacy specialisation from Leiden University.

masters.universiteitleiden.nl/farm

Technical Medicine

 DUTCH  ENGLISH  SEPTEMBER  3 YEARS  LEIDEN  DELFT ROTTERDAM

The programme of Technical Medicine is a unique interdisciplinary joint-degree master's programme, offered by the Delft University of Technology, Erasmus University Rotterdam, Leiden University and their Academic Medical Centers. It's a multidisciplinary programme which links science and technology with clinical practice and its professional medical procedures. The master's programme offers two tracks. Please visit our website for the specific descriptions of our master's tracks.

Specialisations

- Imaging & Intervention
- Sensing & Stimulation

Career

The prospects for clinical technicians in the job market are promising. Technology is becoming increasingly important in health care and is resulting in a growing need for technically qualified medical professionals. Clinical Technicians create and apply new solutions for technical-medical problems in direct patient care by devising new, better and safe diagnostics and therapeutic procedures.

Best preparatory bachelor's

BSc degree in Clinical Technology from a Dutch university.

Language proficiency

Language requirement Dutch (and English): the theoretical MSc programme will be taught in Dutch and English; the skills training and the communication in the clinic will be in Dutch. Students with a foreign bachelor's degree certificate may only be admitted if they meet the specific requirements in Dutch (NT2).

masters.universiteitleiden.nl/tm

Vitality and Ageing

 ENGLISH  SEPTEMBER  1 YEAR  LEIDEN THE HAGUE

The Master's in Vitality and Ageing prepares you for an important role in improving the future of our care. The degree combines different perspectives on growing older in good health, public health and health management. You will learn and work together in small groups with students with different study backgrounds and with diverse nationalities. You will gain knowledge about biology of ageing, learn about the implications of ageing on an individual and societal level and you will acquire knowledge about health management of an ageing population.

Furthermore, you will also develop academic and personal skills, such as communication, leadership and research skills. Through an individual learning pathway you can work on or develop further on a topic of your own interest. Because of the relatively small scale of the programme, there is much individual guidance, such as mentoring and professional development sessions. Throughout the programme you will collaborate with, senior citizens, visit (inter)national potential employers, attend network events, and give presentations for actors in the field. By the end of the master's, you will combine your gained knowledge and skills in a scientific thesis and internship of 10 weeks. Quite some students take the opportunity to do their internship abroad.

The master's Vitality and Ageing is an intensive one-year fulltime programme. Since 2022-23, it is also possible to follow the programme part-time, where you follow the same curriculum, spread over two years. This part-time programme is also aimed at professionals in the working field. It involves 2-3 days of self-study per week, plus on Friday live working groups.

Career

Alumni of the Master's Vitality and Ageing start their careers in various academic positions. Most alumni, 78%, work in a job

related to the study, and 75% of the students find a job quickly: within 3 months after graduating. Some examples: PhD tracks at various universities, project leaders, staff advisers in research and health organisations, and policy developers. Some choose to continue their education with a second Master's (predominantly students with a bachelor degree in Medicine).

Best preparatory bachelor's

A health-related bachelor's degree. Additionally, we invite students with other bachelor's backgrounds, and especially international bachelor's backgrounds to visit our website and view our specific entry requirements.

English proficiency**

IELTS: each test component must score a minimum of 6.0; with an average score of at least 6.5;
TOEFL internet-based: an overall score of 90, each test component must score a minimum of 22.
Cambridge C2 proficiency (CPE) or C1 advanced (CAE) 180, Cambridge component score 176.

masters.universiteitleiden.nl/va

Population Health Management

 ENGLISH  SEPTEMBER  2 YEAR  THE HAGUE

Today's health care system faces many challenges. Population Health Management aims at tackling these challenges in a broad sense and has emerged as an important strategy for health care worldwide.

The two year programme combines knowledge insights from epidemiology, data analysis in healthcare, medicine, public administration and behavioral sciences into a globally unique interdisciplinary program. Students with various backgrounds work together through a combination of both online- and intensive on-campus education.

At the end of the programme, you will be prepared to work as an interdisciplinary academic trusted partner, contributing - as a strategic broker - to the changes needed in today's fragmented healthcare system.

Career

After graduating, you will have the opportunity to work at different organisations in strategic staff positions, researcher at an academic institute, or - depending on your specialisation - as a data scientist. You will be equipped with the skills necessary to thrive in institutions, insurers and suppliers within healthcare and social care, as well as at international, national and local policy organisations. You will be the broker between various perspectives, bridging gaps between fields and with a clear vision on future sustainable healthcare.

Best preparatory bachelor's

A health-related bachelor's degree. Additionally, we invite students with other bachelor's backgrounds, and especially international bachelor's backgrounds to visit our website and view our specific entry requirements.

English proficiency

IELTS: each test component must score a minimum of 6.0; with an average score of at least 6.5;
TOEFL internet-based: an overall score of 90, each test component must score a minimum of 22.
Cambridge C2 proficiency (CPE) or C1 advanced (CAE) 180, Cambridge component score 176.

masters.universiteitleiden.nl/phm

Faculty of Science

The Faculty of Science is a world-class faculty where staff and students work together in a dynamic international environment. The research carried out at the Faculty of Science is very diverse, ranging from mathematics, information science, astronomy, physics, chemistry, life sciences and bio-pharmaceutical sciences to biology and environmental sciences. The research activities are organised in eight institutes. These institutes offer twelve English taught master's programmes.

Astronomy

ENGLISH FEBRUARY START SEPTEMBER 2 YEARS LEIDEN

Students in the Astronomy programme are trained by leading experts in the field of cutting-edge astronomical research. During their Astronomy Master's programme, students make use of observations and data from the world's foremost ground- and space-based telescopes as well as theoretical, computational and astrochemical modelling, large scale simulations, and laboratory experiments that mimic conditions in space. The programme offers a lot of flexibility in choosing your courses and research focus and can be tailor-made to your specific interests.

Specialisations

- Astronomy Research
- Astronomy and Cosmology
- Astronomy and Data Science
- Astronomy and Instrumentation
- Astronomy and Education (partly in Dutch)
- Astronomy and Business Studies
- Astronomy and Science Communication and Society

Career

Graduates find employment in research, industry and the public sector, including technological, data science, financial and consultancy companies, research institutes, governments and science communication organisations.

Best preparatory bachelor's

A bachelor's degree in astronomy or physics with modules in astronomy. Candidates holding a bachelor's degree in related sciences such as mathematics, computer science or aerospace engineering may be considered.

English proficiency**

IELTS: 6.5 (minimum 6.0 per component)/ TOEFL internet-based: 90 (minimum 20 per component)

masters.universiteitleiden.nl/astronomy

Biology

ENGLISH FEBRUARY START SEPTEMBER 2 YEARS LEIDEN

The MSc Biology programme is a collaboration between the Institute of Biology Leiden, Naturalis Biodiversity Center and the Institute of Environmental Sciences, giving it a broad and diverse scope. Our programme provides you with a detailed understanding of different aspects of life, from how it functions on a molecular and genetic level, to how it evolves and responds to environmental challenges. This knowledge is of great value to society. The programme offers a lot of flexibility in choosing your courses and research projects, so it can be tailor-made to your specific interests.

Research-oriented specialisations:

- Biodiversity and Sustainability
- Evolutionary Biology
- Molecular, Cellular and Organismal Biology
- Molecular Genetics and Biotechnology

Practical-oriented specialisations:

- Biology and Business Studies
- Biology and Education (Dutch language proficiency required)
- Biology and Science Communication & Society

Career

Career options include positions as researcher, policymaker or adviser, as well as professions in industry, education or other organizations where biological knowledge and academic skills are needed.

Best preparatory bachelor's

A bachelor's degree in biology. The Board of Admissions will review applications from candidates holding a bachelor's degree in related sciences such as natural sciences, life sciences or biomedical sciences.

English proficiency**

IELTS: 6.5 (minimum 6.0 on each subtest)
TOEFL internet-based: 90 (minimum score of 20 on each subtest)

masters.universiteitleiden.nl/biology

Bio-Pharmaceutical Sciences

ENGLISH FEBRUARY START SEPTEMBER 2 YEARS LEIDEN

In this master's programme, you are trained at the leading edge of drug design and fundamental research into novel drugs, optimisation of existing drugs, and personalised medicine.

Research specialisations

- BioTherapeutics
- Drug Discovery and Safety
- Systems Biomedicine and Pharmacology
- Bio-Pharmaceutical Sciences and Industrial Pharmacy (in Dutch)

Vocational specialisations

- Bio-Pharmaceutical Sciences and Industrial Pharmacy (in Dutch)
- Bio-Pharmaceutical Sciences and Business Studies
- Bio-Pharmaceutical Sciences and Science Communication and Society
- Bio-Pharmaceutical Sciences and Education (partly in Dutch)

Career

Graduates' careers generally are closely related to the field of drug discovery and design or the development and production of drugs. Options outside research include the pharmaceutical industry, biotechnology companies, teaching or government institutions.

Best preparatory bachelor's

A bachelor's degree in bio-pharmaceutical sciences or pharmaceutical sciences.

English proficiency**

IELTS: 6.5 (minimum 6.0 on each subtest)
TOEFL internet-based: 90

masters.universiteitleiden.nl/bps

Chemistry

ENGLISH FEBRUARY START SEPTEMBER 2 YEARS LEIDEN

The MSc programme in Chemistry offers you access to cutting-edge research. This research is concentrated in two areas: Chemical Biology and Energy & Sustainability.

Students in the research area Chemical Biology will study fundamental biological and biomedical problems to understand physiological processes at the molecular level. Students in the research area Energy & Sustainability will focus on the development of new sources of sustainable energy and the use of storage of energy or the development of new catalysts.

Specialisations

- Research in Chemistry
- Chemistry and Business Studies
- Chemistry and Education (partly in Dutch)
- Chemistry and Science Communication and Society

Career

Positions in academia, or in R&D departments in industry, business, public utility companies, teaching, consultancy and government bodies. Many graduates attain higher management positions.

Best preparatory bachelor's

A BSc in Molecular Science and Technology (MST) from Leiden University and TU Delft or a degree in chemistry from another university or in a related field.

English proficiency**

IELTS: 6.5 (minimum 6.0 on each subtest)
TOEFL internet-based: 90

THE HAGUE

This programme is taught in

The Hague

The Governance of Sustainability master's programme educates students how to integrate a governance perspective (social sciences) and natural science perspectives in order to develop and improve the quality of governance solutions to major sustainability challenges. Students become change agents on sustainability, through the synthesis of different scientific fields and non-scientific knowledge and insights. Governance of Sustainability is unique in its equal combination of natural science and social science and its focus on transdisciplinary skills.

Career

The programme prepares students for governance and strategic positions at (semi-) government institutions or private sector on sustainability issues and to take leading broker-roles connecting different actors.

Best preparatory bachelor's

Applicants holding a bachelor's degree from an accredited university programme and comparable with three years of Dutch academic education can be admitted to the programme. The bachelor's must include one or multiple courses that included a minimum of 8 EC of mathematics, programming and/or statistics.

English proficiency

IELTS: 6.5 (minimum 6.0 on each subtest)
TOEFL: internet-based 90 (minimum 20 component score)

Media Technology

ENGLISH

START

FEBRUARY
SEPTEMBER

2 YEARS

LEIDEN

The Media Technology master's programme connects science, creativity and curiosity. The student's personal autonomy in research is central: you are encouraged to formulate your own scientific questions and translate personal inspirations and curiosities into research projects. The curriculum focuses on creative exploration and understanding of scientific research and technology.

Career

Media Technology MSc alumni are called autonomous researchers, because they master creative and critical thinking. A broad array of career prospects therefore applies to them, while many pursue a future in scientific research. Career positions vary from PhD researcher to lecturer in higher education and from creative entrepreneur to coder or artist.

Best preparatory bachelor's

The programme welcomes students from a wide variety of (educational) backgrounds, e.g. Computer Science, Artificial Intelligence, Communication and/or Information Science, Cognitive Science, Biology, Linguistics, or Performing and Creative Arts. Media Technology students have a creative attitude and are familiar with fundamental and/or knowledge-driven research, with technology and its embedding in the human context and with the basics of imperative programming.

Physics

ENGLISH START SEPTEMBER 2 YEARS LEIDEN

The Physics master’s programme offers you a research-intensive and tailor-made study path on current topics in experimental and theoretical physics at an institute of international renown.

Specialisations

- Physics and Business Studies
- Physics and Education (partly in Dutch)
- Physics and Science Communication and Society
- Research in Physics, Biological and Soft Matter Physics
- Research in Physics, Classical/Quantum Information
- Research in Physics, Cosmology
- Research in Physics, Theoretical
- Research in Physics, pre-PhD (‘Casimir’)
- Research in Physics, Quantum Matter and Optics

Career

The master’s degree is an excellent stepping stone for pursuing a PhD degree. Job possibilities outside research include high-tech industry, software and consultancy companies worldwide, or a career as a teacher, science communicator or science policy maker.

Best preparatory bachelor’s

A bachelor’s degree in physics.

English proficiency**

IELTS: 6.5 / TOEFL internet-based: 90

📍 masters.universiteitleiden.nl/physics

Statistics and Data Science

ENGLISH START SEPTEMBER 2 YEARS LEIDEN

This two-year master’s programme provides you with a thorough introduction to the general philosophy and methodology of statistical modelling, data analysis and data science with a focus on applications in the life and behavioural sciences.

Specialisations

This programme does not offer specialisations. Coherent sets of electives allow students to specialize in a certain application area or research domain such as:

- Medical Statistics
- Biostatistics and Biometrics
- Data Science
- Psychometrics and Sociometrics
- Official Statistics (the EMOS specialization)

Career

With a Master of Statistics and Data Science you have good job perspectives: statisticians are highly sought after in various industries such as food and pharmaceutic industry, in governmental organizations, and in healthcare. Qualification to become a PhD candidate is a definite possibility.

Best preparatory bachelor’s

A bachelor’s degree from a research university with at least 20 ECTS of statistics/advanced methodology and/or (higher) mathematics courses.

English proficiency**

IELTS: 6.5 (minimum 6.0 on each subtest)
TOEFL internet-based: 90

📍 masters.universiteitleiden.nl/statisticalscience

Faculty of Social and Behavioural Sciences

At the Faculty of Social and Behavioural Sciences, anthropologists, experts on education and child studies, political scientists, psychologists and experts in scientific research studies are increasing our understanding of current developments in society. With modern research methods, these disciplines are developing fast, and interdisciplinary research is helping to provide answers to societal issues.

The faculty offers six master's programmes in behaviour and society, two of which are research master's. These selective two-year programmes are more demanding than the one-year programmes and have a stronger focus on research.

The faculty supports you to ensure that you successfully complete your studies. You can, for example, make use of the Master Thesis Lab, with walk in sessions on statistics and academic writing.

Cultural Anthropology and Development Sociology

ENGLISH START SEPTEMBER 1 YEAR LEIDEN

This programme foregrounds ethnography as a method, to create insights into everyday cultural practices relevant to global processes of change. You can either propose your own individual research project (Global Ethnography), conduct more applied research with an organisation or interest group (Sociology of Policy in Practice), or engage in a research project which foregrounds audiovisual methods (Visual Ethnography). Research projects can be conducted worldwide, both in face-to-face settings, as well as using online and digital tools.

Specialisations

- Global Ethnography
- Sociology of Policy in Practice
- Visual Ethnography (starts only in September)

Career

Our graduates typically embark on careers in media (press, online), non-governmental organisations, local, provincial and national administration, teaching, the creative and digital field, as well as in academia.

Best preparatory bachelor’s

A Bachelor in Cultural Anthropology and Development Sociology or a bachelors degree with a major in Cultural Anthropology and Development Sociology, or equivalent from an internationally-recognised university.

English proficiency**

IELTS: 6.5 / TOEFL internet-based: 90

📍 masters.universiteitleiden.nl/anthropology

Education and Child Studies (Research)

ENGLISH START SEPTEMBER FEBRUARY 2 YEARS LEIDEN

This programme aims to teach students how they can independently derive a research question in the field of Education and Child Studies. Students learn how they can contribute to the development of new fundamental theoretical insights or well-grounded practical theories by conducting scientific research. The research master’s programme trains students to become scientist-practitioners who can bridge the gap between research and practice.

Career

Graduates are prepared for functions in the public or private sector in which advanced research skills and substantial practical research experience are among the qualifications required (research agencies or research departments in businesses or governmental organisations). At the same time the master's programme trains students for functions or educational courses in which scientific research is performed for an academic dissertation and doctoral degree in the sciences.

Best preparatory bachelor's

A bachelor's degree in one of the behavioural sciences or a degree in an equivalent programme. Specialisation-specific knowledge and training in research methods and methods and statistics (minimum of 20 EC) are required.

English proficiency**

IELTS: 7.5 / TOEFL internet-based: 113

masters.universiteitleiden.nl/education-child-studies-research

Education and Child Studies

ENGLISH START SEPTEMBER FEBRUARY 1 YEAR LEIDEN

This programme focuses on the link between theory, research and practice. Students are taught to seek evidence-based solutions to problems occurring in child-rearing and education.

Specialisations

Five of the nine specialisations are taught in English.

- Applied Neuroscience in Human Development
- Parenting and Child Development
- Digital Media in Human Development
- Educational Science
- Forensische Gezinspedagogiek (in Dutch)
- Kinderen met Leer- en Gedragsproblemen in het Onderwijs (in Dutch)
- Leerproblemen (in Dutch)
- Learning Problems and Impairments: international track
- Orthopedagogiek (in Dutch)

Career

Graduates can apply for a variety of jobs in the field of prevention and intervention in child-rearing and education, both in clinical and non-clinical contexts.

Best preparatory bachelor's

Prospective students need to possess the skills, understanding and knowledge that are required for earning a Bachelor's in Education and Child Studies at Leiden University.

English proficiency**

(Only for the English taught specialisations)

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/education-child-studies

Political Science

ENGLISH START SEPTEMBER FEBRUARY 1 YEAR LEIDEN THE HAGUE

Study power and politics as they impact everyday lives in a top-ranked, selective programme. By doing an MSc in Political Science in Leiden or The Hague, you will benefit from an advanced grounding in the fundamentals of political analysis and advanced training in essential academic skills and research methods. There are six specialisations and two cities you can choose from:

Leiden

- Dutch Politics (partly in Dutch)
- International Politics
- Nationalism, Ethnic Conflict and Development
- Democracy and Representation
- Political Theory: Legitimacy and Justice

The Hague

- International Organisation

Career

Graduates have gone on to positions such as a policy maker in Dutch and foreign government institutions; political reporter for various media, personal assistant or policy adviser at the European Parliament and national parliaments, lobbyist for interest groups; researcher at think tanks and universities, business consultant and risk analyst.

Best preparatory bachelor's

A bachelor's degree in political science or a related discipline. Specific knowledge related to this field is also required.

English proficiency**

IELTS: 7.0 / TOEFL internet-based: 100

masters.universiteitleiden.nl/politicalscience

Psychology

ENGLISH START SEPTEMBER FEBRUARY 1 YEAR LEIDEN

This programme focuses on psychological processes and the consequent effects on behaviour. The master's programme has ten specialisations you can choose from:

Specialisations

- Applied Cognitive Psychology
- Economic and Consumer Psychology
- Methodology and Statistics in Psychology
- Occupational Health Psychology
- Social and Organisational Psychology

Maximum capacity and selection procedure apply to the following specialisations:

- Child and Adolescent Psychology
- Clinical Neuropsychology
- Clinical Psychology
- Health and Medical Psychology
- School Psychology

Career

Job opportunities include being a psychologist in a medical centre, nursing home, psychiatric hospital or forensic clinic, school counsellor, lecturer/ researcher at a university, medical centre or research institute, human resources expert, marketing adviser, policy maker or adviser for government and municipal services.

Best preparatory bachelor's

BSc in Psychology with advanced courses (at least 30 EC) at a third-year bachelor's level on topics pertaining to the preferred master's specialisation within the MSc in Psychology. A level of knowledge of statistics equivalent to the courses within the BSc in Psychology at Leiden University (at least 20 EC in statistics courses).

English proficiency**

IELTS: 6.5 / TOEFL internet-based: 90

masters.universiteitleiden.nl/psychology

Psychology (Research)

ENGLISH START SEPTEMBER FEBRUARY 2 YEARS LEIDEN

This programme offers thorough training in the methodological and practical skills required to carry out scientific research on human behaviour, with a focus on practical experience. There is the possibility of following courses on Brain and Cognition offered by other Leiden University programmes. You can choose from four specialisations:

Specialisations

- Clinical and Health Psychology (research)
- Cognitive Neuroscience (research)
- Developmental Psychology (research)
- Social and Economic Psychology (research)

Career

The programme prepares students to continue with an academic career and obtain a PhD in Psychology. Alumni also obtain positions where basic or applied psychological research is used to support the development of corporate or public policy. These include research agencies, as well as private firms, municipal, and governmental institutions.

Best preparatory bachelor's

BSc in Psychology with a third-year (400-level) course on the topic chosen, high average grade for coursework (>7.5), superior grade for the bachelor's thesis (7.5 or above).

English proficiency**

IELTS: 6.5 / TOEFL internet-based: 90

masters.universiteitleiden.nl/psychology-research

Leiden University Graduate School of Teaching (ICLON)

Teaching Master (60 EC)
Teacher training prepares students for a career as a teacher in Dutch secondary education (lower and higher grades). After completing the teacher training programme, you will be awarded a (second) master's degree and a Dutch qualification in the school subject of your teacher-training programme. In order to gain admission to the teacher training programme you must hold a bachelor's degree in the subject you would like to teach and a master's degree. Although the teacher training is a second master's programme, the tuition fees are equal to those of a first master's programme. The programmes are offered by Leiden University Graduate School of Teaching (ICLON). These master's programmes train students to become teachers in the Dutch educational system; all the training programmes are therefore taught in Dutch.

Science Teaching in Secondary Education (60 EC)

Specialisations

- Biology
- Chemistry
- Mathematics
- Physics

📍 masters.universiteitleiden.nl/stse

Teaching Social Sciences and Humanities in Secondary Education (60 EC)

Specialisations

- Art History and Cultural and Art Education
- Business Economics
- Economics
- History and Civics
- Philosophy
- Religious Studies
- Social Studies

📍 masters.universiteitleiden.nl/tssh

Language Teaching in Secondary Education (60 EC)

Specialisations

- Chinese Language and Culture
- Classics
- Dutch
- English
- French
- German
- Spanish

📍 masters.universiteitleiden.nl/ssh

Teaching Master (120 EC)

In this two-year master programme, you will continue to study Dutch/English/French/German/Religion and you will follow teacher-training courses including school practice at a secondary school. After completing the master programme, you will be awarded a master's degree and a Dutch teaching qualification for secondary education (lower and higher grades).

This master programme trains students to become a teacher in the Dutch educational system; the training programme is therefore taught in Dutch.

Language and Culture Education (120 EC)

Specialisations:

- Dutch
- English
- French
- German

📍 masters.universiteitleiden.nl/lce

Social Sciences and Humanities Education (120 EC)

Specialisations:

- Religious Studies

€2,209	Non-EU/EEA student tuition fee

NOTE: Tuition fees are subject to change. Please check online our updated tuition fees.

Bera Elyesa Topkara
Middle Eastern Studies

Leiden University has an excellent reputation around the globe as one of the leading institutions for science and academic research. Especially in my academic field Leiden University is one of the leading universities dealing with the History and Culture of the Middle East. The University holds one of the biggest collections of Arabic and Turkish manuscripts in Europe and provides excellent teaching in English.

For someone who is used to live in big city's Leiden is surprisingly small in first place. But over time I enjoyed the cosiness of Leiden and was accustomed to it very quickly. The small cafes and shops give the city their very own character. The fact that the university faculties are spread all over the city helped me to explore Leiden much quicker. The ability to study, have fun, and do sports in various places make Leiden a great student city!

‘ Leiden University has good professors and is international in character. At the same time, it’s friendly, small-scale and fun.’

Jari Boekhorst – Master’s in European Law (LLM)
